

Your three M's way to a millionaire

As a future millionaire, you should have all of them before starting the work, Otherwise your dreams gonna be crushing fast, faster than light sound or even speed itself

Richness comes from businesses so a job won't cut things to the top as you may hope, and to get high on the ladder you should do things right and clearly, you can't get a good mark with half-assed work

So the formula is like this :

“Message in Media to Market”

Let's do it from end this time and start with the **market!** yes the place from where the money moves and from where you want to take your share, so study it, what you can add to it, take from it, or change

In other words: what is your business serving?

Media or as my professor said once the medium that can make you float in the desert, reach the well and have your thirst quenched
It's the way you can reach the places or persons you are targeting!
So basically the way to get your message across to the market

The **message** is what comes first and also is what really matters, it's the whole point of this article it's been put last for a reason!

The reason ? is a silly one actually... I tend to hide the most valuable thing in a close place or in a clear area

Full visible things tend to be ignored because we all think there is a secret to something! the truth? there is and i won't tell you

Find out yourself here (a link to my other copy ? [the No-secrets copy](#))

**Be open-minded for a bit with me and read this analogy
a message or copy. we name it bullets
A medium which is like a rifle pistol or even RPG
A market that is our target goal (not enemy yet)**

**What is the most important in this?
How can you maximize your shooting range?
Can you shoot your target clearly?
Real or fake bullets?
Did your weapon make noise? what's the range? accuracy?
Wind speed! altitude?
Wanna kill or incapacitate? headshots?**

**Well find the answers yourself but you got the idea!
To get a good and clear shot you need the 3 factors all set up right
And then shoot your way to the top with that
You can shoot with any combination you have! but are they all the
same? absolutely not... changing factors means changing the result
and you will know once you try if you don't try yet then you won't know
till you do it Don't ask how to
test then get a result, analyze, change and test again it's the way of
creation and you didn't get born from the first night your father did it**

that's you so do as it was done to have you ... fuck it up again
