1. Introduction

DegenNap (\$DEGENAP) is a pure meme coin born from the true degen spirit of the Luna Classic community.

“Stay Ahead with DegenNap” – Real-time crypto trends and insights to guide your investments, all while keeping the relaxed and fun anime vibe.

Our logo features a beautiful anime girl with blue hair sleeping peacefully.

She symbolizes:

- **When the market is “sleeping” (bear market) or the LUNC army feels tired of waiting, we stay calm and ready to wake up at any moment.**
- **Global anime appeal that makes \$DEGENAP instantly recognizable and loved by communities around the world.**
- **“Nap” = taking a short rest, but soon she will wake up and pump together with LUNC.**

2. The Birth of \$DEGENAP

Back in late 2025, while the market was quiet and the LUNC army was getting tired of waiting for the next big pump, a small group of true degens from Terra Classic decided to create something fun and full of energy.

\$DEGENAP was born from a viral pump in the Luna Classic community with a simple idea:

“We need a meme coin that doesn’t just follow the trend, but actively supports and boosts the spirit of LUNC.”

From there, DegenNap was created as a coin that:

- **Represents the fun and degen side of LUNC holders**
- **Gives positive energy so LUNC is not only “valuable,” but becomes the future and a proud asset for the community**

- Invites everyone to go to the moon together (Together to the Moon)

The anime girl with blue hair sleeping peacefully became the main attraction. Her cute and aesthetic design quickly went viral among anime lovers and crypto degens worldwide.
