Community Services

RECOMMENDATIONS	EXTENT OF COMPLIANCE (%)	INTERVENTIONS DONE (OUTCOME)	REMARKS
1. The impact assessment of the matured extension projects may be conducted to ascertain sustainability of the community service projects and to draw evaluations from the partners.	80%	• Prepared and submitted an impact assessment proposal to the Office of Research Services (ORS). • Partnered with Pangasinan State University (PSU) under an existing MOU to commence data collection among Alternative Learning System (ALS) beneficiaries. • Coordinated with the Office of Extension Services regarding the institutional impact assessment proposal pending Board of Regents (BOR) approval.	*Partially Complied / Ongoing.* Data collection with ALS beneficiaries has commenced through PSU.
2. To ensure that extension programs and projects are relevant, impactful, and responsive to community needs, the BS Statistics program may conduct a thorough and documented needs assessment prior to the implementation of any extension activity. This needs assessment should utilize	100%	• Forged formal linkages with partner institutions, including LGU-La Trinidad. • Conducted needs assessment activities and collated gathered data to inform extension project design. • Continued responsive extension engagement, such as the February 2026 statistical training for PSA CBMS teams.	

Community Services

appropriate methodologies to gather data on the needs, priorities, and resources of the target community, and it should be used to inform the design and implementation of the extension program or project. The result of the needs assessment should be documented and used to justify the program's objectives, activities, and resource allocation.
