

Final Recap of the Course:

1. What has shifted in your understanding of how AI influences knowledge visibility and legitimacy?
2. Where do you now see risks in algorithmic curation for educators or learners?
3. What is something you've changed your mind about, or think others often overlook?
4. How might you apply these insights in your own teaching, research, or digital practices?
5. Looking ahead: What role should educators play in resisting or reshaping algorithmic gatekeeping?

Choose one of the prompts, and respond below with your name.
