I will ask them what they would like to learn about and what they are looking forward to doing as a class in year for a student whose mother tongue is not Arabic. Objective: When the students come to the first class, they are eager to know what will be taught in the course, what the teacher will be like, what will be required of them, and how they will be evaluated. Some will not buy the required textbooks until such questions are answered. It is therefore safest to keep the first class focused, straightforward, and organized. I believe that my teaching can proceed much more smoothly if I use the first class meeting as a time to find out what students expect from the course and help them align their expectations with what I intend to do in the course.
