

Rainbow Review - Live Conference Demo Version

*For the template for this activity, [see resource #4 listed here](#)

Directions

- Using only your classmates and memory, explain each idea, event, or vocabulary in as much depth as possible. (no Google or ChatGPT)
- Once on a team, decide what color you will write in, then replace the “Student X” text with your name next to that color. You must continue to write in this color for each concept (you will have to go in and change it before you begin typing each round)
- We will rotate through each box in 30 second intervals. Explain each to the best of your ability, picking up where the last person left off each time
 - Add on to, **BUT DO NOT DELETE**, the additions of the previous person
 - If you feel all info is already provided and correct, give examples, related concepts, or add a photo
