Attendance Support for Drupal Events

From the Wiki (http://wiki.esipfed.org/index.php/Drupal_Working_Group), go to RESOURCES section:

1. Drupalcon Los Angeles 2015 - http://wiki.esipfed.org/index.php/Drupalcon_LA_2015
 - a. Specifics:
 - i. **DrupalCon is May 11-15 in Los Angeles, CA**
 - ii. If you plan to enter your name, reserve a hotel room now!
<https://events.drupal.org/losangeles2015/travel>
 - iii. \$1500 support for two (2) ESIP members
 - b. Requirements:
 - i. ESIP member organization
 - ii. willing to report out at an upcoming telecon or ESIP Summer Meeting
 - iii. possibly help with ScienceOnDrupal BoF, but not required
2. Drupal Camps 2015 - http://wiki.esipfed.org/index.php/Drupal_Camps_2015
 - a. Specifics:
 - i. Any camp you can find. May include ESIP Summer Meeting (Asilomar, CA July 2015)
 - b. Requirements:
 - i. ESIP member organization
 - ii. willing to provide a brief report out at an upcoming telecon or ESIP Meeting
 - c. Random or first come first serve until the five (5) \$200 support allowances are assigned

These two drawings are random and **selected winners will be announced at the March 25th Drupal telecon**

How to Enter:

Send an email to: adam@whoi.edu

Your name

Email (or other preferred contact)

ESIP member organization

If applying for DrupalCamp support, **include the name of the camp**

Deadline: Midnight pacific time on **March 23rd**. If less than five participants enter the Drupal Camp drawing, then we will provide support at first come, first served.

ScienceOnDrupal Code Sprints

- Report out on **2015 Winter Meeting Code Sprint**
 - Trial run of code sprint
 - Slides: <http://goo.gl/jGf8WE>
 - Worked on semantic web issues
 - Setup (demo):
 - Thread for suggestions and voting - <https://groups.drupal.org/node/453743>
 - Trello board for task tracking - <https://trello.com/b/QX23p1bp>
 - IRC channel for remote participation - #drupal-science
 - Successes:
 - Moved 3 issues forward!!
 - schema.org: dataset support (<https://www.drupal.org/node/2404327>) - testing, feedback with questions
 - rdf indexer: (<https://www.drupal.org/node/2296673>) - testing, found already fixed
 - schema.org cache: combine with schema.org ui module (<https://www.drupal.org/node/2404327>) - patch created, ready for testing
 - Set up and tested infrastructure (see above)
 - Good starting point and template for future efforts
 - Challenges:
 - Participation > target better at developer community, eg:
 - hold at Summer Lab rather than Winter
 - pro-actively contact known drupal developers interested in topic area
 - sign-up process to tell how many people to expect ahead of time
 - improvements to remote participation toolkit?
 - Set up and onboarding, so people can get going on actual tasks quickly > could improve via:
 - Documentation on how to set up stacks for particular topics (eg. rdf indexer)
 - Pre-packaged stacks for different topics (eg. docker, or as a makefile)
 - Contribution skills and knowledge > Training for contribution skills beforehand (eg. in webinars)
- Future plans:
 - Generic docs (eg. signup, join in remotely etc.)
 - For each topic (eg. semantic web, data-one integration)
 - Page on groups.drupal.org
 - Recommended stack - as a focus for training / effort
 - Configuration and usage docs / resources (for content editors)
 - Development Setup (for developers)
 - Thread for suggestions
 - Trello board with current tasks
 - Monthly sessions on #drupal-science IRC
 - office hours (for help setting up and using modules)
 - code sprint (to discuss and work on code issues)
 - Registration process eg.
 - sign up and rsvp
 - send in trello.com username
- **Discuss and get consensus. Does this sound right to everybody? Any other ideas?**

Community of Practice > 2015 Telecons

- We only have 10 or so telecons a year,
- want to make sure they are worthwhile
- considering having the telecons **informed by activity** at:
 - ScienceOnDrupal d.o Groups page:
<https://groups.drupal.org/science-on-drupal> (explain again why we have this - more than just **ESIP members** - including the larger Drupal community)

or the **ESIP Drupal mailing list**:

<http://lists.deltaforce.net/mailman/listinfo/esip-drupal>

- issues are kept track at: Trello board
<https://trello.com/b/QX23p1bp/science-on-drupal-code-sprints-sodsprint>
 - for example, **DataONE API Drupal Module**:
<https://trello.com/c/RigbDDGH/8-dataone-api-module>
- we can invite experts in the field to come present at telecons addressing specific needs
- **discuss and get consensus. does this sound right to everybody? Any ideas for telecons?**

Telecon ideas:

- > contributing to drupal
- > tie with code sprint topic focus areas eg.
 - > schema.org module walkthrough
 - > DataONE API walkthrough

March Telecon

1. Announcement of DrupalCon/Camp winners
2. Looking at the ESIP Strategic Roadmap
 - a. got some feedback from Emily Law that we want to review with you
Strategic Roadmap spreadsheet is here (just so we don't forget):
<https://docs.google.com/spreadsheets/d/16f8heiZX3KoLCPfxMKTbROiG-es6y2I7m9zkuXP-964/edit#gid=0>
 - b. fix our web presence?
 - c. where does Drupal WG fit in?
 - d. how can we collaborate with other clusters/WGs. which ones?
 - e. got ideas or Drupal work that you need done? let's discuss and work on it together
3. DataONE API Design Document and Requirements?
4. Summer Lab topics and ideas?
 - a. Forthcoming survey
 - b. Review Trello board and other ideas presented on the esip-drupal mailing list and ScienceOnDrupal d.o groups page

Summer Lab ideas:

- > Survey existing applications of Drupal - create a showcase and identify topics of interest
 - possibly join with this list: <https://groups.drupal.org/node/168824>
- > Interweave with other groups - lightning talk on a drupal application or project in other sessions
-

Webinar Ideas:

- Export On Drupal contribution for helping us run better code sprints
- Schema.org module walkthrough to help address the issue queue there
- Data Citation Drupal module (Force11.org could present on citation best practices)

Other ideas:

- Get feedback from OpenScience Hack-a-thon on what worked
- > Feed back from Bogota #scienceondrupal BoF
 - Eda's report out:

Hi,

I just want to share with you the results of my visit to Bogotá, Colombia to participate in this DrupalCon.

By the second and last day of the Main Meeting I thought that my intentions to make connections with information managers that work with scientific communities on this part of the world were futile. I had a BoF and nobody showed up.

Luckily, I stayed to participate in the "Sprint" (a meeting to resolve Drupal issues in group) of this event. All countries were able to have a person address to the group and so did I. I let them know about DEIMS and the "Science on Drupal" group.

In summary, two persons approached me to get my email address so I can send them the links to the corresponding drupal-scientific pages, one from Perú and another from Brazil. I have already communicated by email with the former.

Finally, two links that I learned in this activity and that I think will be of your interest are:

<https://events.drupal.org/losangeles2015/higher-ed-summit> - a newly incorporated session of the DrupalCon program, starting in next May DrupalCon that will be held in Los Angeles.

<https://groups.drupal.org/node/168824> - a page that lists "sites and/or applications and/or modules (**Drupal based**) that are related to science."

I must say that once again DrupalCon experience gave me more knowledge of Drupal and the satisfaction of having worked with a great group of people.
