

Keeping in mind Canadian Federalism, what do you think [Canada's Commitment to Open Government](#) should include when it comes to cities?

WG Members:

- Jean-Noe Landry, Open North
- Tracey P. Lauriault, Carleton University
- Pamela Robinson, Ryerson University

**List your ideas here!**

National Urban Spatial Data Infrastructure

- National framework datasets:
  - City boundaries & wards
  - Health districts
  - School board catchment areas
  - Police districts
  - Electoral districts
  - Census geographies be organized by city boundaries
  - Open data in portals be aggregated into standardized national geographies
- Data in Federal open data portals be aggregated into local and small standardized geographies

National Urban Open Data Program

- Data infrastructural support for small cities

Smart Cities

- That all smart city initiative adhere to the principles of openness
- National scale open Things network for IoT

Federal lands

- Federal government endeavour, when dealing with smart city technology on federally government owned land, to commit to the principles of open government principles in all procurement/and re-sale
- 

\*\* what do we do with the national data strategy movement? Urban piece in it

-
