

# FAITH WANJIKU NJOROGE

## PERSONAL INFORMATION

I have always fancied myself with computers since my childhood... I enjoy acquiring new skills and information, which help me adapt to the fast-moving world... In a few years, I hope to be a software engineer either self-employed or employed.

## OBJECTIVE

A motivated and talented individual with a strong background in UI/UX design and development. Eager to apply my knowledge of JavaScript, CSS, HTML, and frameworks like React, PHP, and Node.js to create innovative user interfaces and experiences.

## ACHIEVEMENTS

- Studied computer studies both at the primary and secondary levels.  
My journey from primary to secondary level computer studies has likely provided me with a solid foundation in technology, problem-solving, and digital literacy, which are valuable skills in today's digital age and can lead to numerous career opportunities in the tech industry
- Was a dorm secretary. A leader from form two to form four.  
I served as a dorm secretary and held a leadership role for three years. This experience involved administrative duties, organization, and the responsibility of overseeing dorm-related matters, demonstrating my leadership and commitment in that role
- Worked as a self-employed person throughout the time after high school.  
I had the autonomy to make decisions, set my schedule, and handle all aspects of my business. This experience likely required self-discipline, entrepreneurial skills, and the ability to manage my finances and clients independently
- Went for an attachment in Plant operations at Kenya Electricity Generating Company (Kengen).  
During my attachment at KenGen Company, I gained valuable insights into the energy industry. I had the opportunity to apply theoretical knowledge in a real-world setting, honing practical skills. Interacting with professionals provided a deep understanding of industry practices. The experience enhanced my teamwork, communication, and problem-solving abilities, contributing significantly to my overall professional development.

- Participated in a two-week job shadowing program at Diamond Trust Bank, gaining valuable insights into various banking roles, including customer service, financial analysis, and risk management. Observed daily operations, engaged in meetings, and shadowed professionals to enhance understanding of banking procedures. Developed analytical, communication, and interpersonal skills, showcasing adaptability in a fast-paced financial environment. The experience provided practical knowledge and industry exposure, contributing to a well-rounded skill set for future endeavors.
  
- Participated in a seven-month internship at Ace Solutions Africa, a web development company, gaining comprehensive experience in web design, front-end development, and back-end development using PHP and WordPress. Actively contributed to team projects, collaborated with developers and designers, and engaged in client meetings to understand project requirements. Improved problem-solving, technical, and communication abilities through hands-on work and direct involvement in various stages of web development projects. Demonstrated adaptability and time management skills in a dynamic and fast-paced environment, gaining practical industry knowledge and a robust skill set for future professional endeavors.

## ACHIEVEMENTS AT NAIROBITS TRUST

### **Multidisciplinary Design**

- It is an approach that involves integrating expertise and perspectives from multiple disciplines or fields to solve complex problems or create innovative solutions. It encourages collaboration among professionals with diverse backgrounds, such as designers, engineers, scientists, and more, to combine their knowledge and skills. This approach aims to produce well-rounded and holistic design solutions that consider various aspects and requirements, resulting in more comprehensive and effective outcomes.

### **Front-End-Development**

- Front-end development is like the design and layout of a website. It's where I use code to make things look good and work smoothly for people who visit a website. I use HTML for structure, CSS for styling, and JavaScript for interactivity. Additionally, I work with popular frameworks like React, Angular, and Vue.js, as well as platforms like WordPress and Wix, to enhance development efficiency and functionality. It's all about creating a nice and easy experience for users on the internet. I have learned a lot here, and I can't wait to showcase my skills in the outside world.

### **Video Impact Training**

- In Video Impact Training, I worked on refining my communication and presentation skills through video. I focused on conveying messages effectively, improving my body language, and enhancing my overall on-camera presence. The goal throughout has been to boost my confidence and effectiveness in both professional and personal settings where video communication is crucial.

## **EDUCATION**

2024:	Ace Solutions Africa	Web Services and Support
2023:	NairoBits Trust.	Diploma In Web Development
2020:	Sensei Institute Of Technology.	Certificate in Plant Operations
