Understanding Satta King

How the Game Works

Satta King is a gambling game where players bet on two-digit numbers from 00 to 99. A lucky draw announces the winning number, and the winner, dubbed the Satta King, can

earn up to 90 times their wager. The game is organized into various markets or "bazaars," each with specific draw times. For example, Desawar results are announced at 5:10 AM, Faridabad at 6:00 PM, Ghaziabad at 9:45 PM, and Gali at 11:45 PM. Recent data from September 28, 2025, shows Desawar hitting 84, following 96 the previous day, illustrating the game's dynamic nature.

The Role of Online Platforms

The rise of digital platforms has made Satta King more accessible. Websites like [satta-king.info](#) provide live results and historical charts, enabling players to track trends. For instance, September 2025's chart shows Gali numbers fluctuating from 68 on the 1st to 19 on the 27th. These platforms fuel anticipation, but the ease of access also heightens addiction risks, as players can bet from anywhere using smartphones.
