

Hello!

As of right now, the mod is not in a finished state and is just a prototype, I didn't intend to release the mod alongside the video but I decided to just in case anyone wants to try it

IMPORTANT NOTES:

- I'd highly recommend downloading the FOV Adjust mod and doing /toggleVisor in game, as your visor acts weird and will take up a fair bit of the screen

Can be downloaded [here](#):

- I've sometimes gotten stuck in areas either in the world or upon respawning, so just be careful of that

What does the Mod do?

- Player is now around 20-25% of their original size
- Jump height is decreased
- Speed is decreased
- Reach distance is decreased
- Infinite Stamina

The following changes are made to help make the movement and reach distance feel more accurate to your size, and the stamina increase is to make the game not as tedious as it would otherwise be

The Mod itself can be downloaded [here](#):
