SUMMARY

Experienced community leader with a background in event coordination, customer relations, content management, & strategic planning. Led over 1k events, collaborating with Open Source, & technical communities.

EXPERIENCE

DATABRICKS, Mountain View, California

Community Leader, 2020-2023

Databricks is a technology company that develops and maintains a platform based on Apache Spark.

- Facilitated 160+ in-person/online meetups for Apache Spark community in the U.S. and Canada, with an average attendance of 50+ members per event.
- Managed Databricks Speakers Bureau, overseeing 200+ technical speakers & enhancing their open source presentation skills.
- Co-created and supervised the first meetup hub at Databricks's developer conference, "Brickstuff 2022," hosting 15+ technical sessions with 20-80 attendees per session.
- Triageed technical questions on Apache Spark and DataCloud across multiple online community platforms, maintaining a 90% resolution rate.
- Hosted 12 live coding webinars, collaborating with Growth Marketing & Technical Training teams.
- Developed and implemented content strategies that boosted community engagement by 30%.
- Coordinated Meta & Stanford sponsorship strategies, aligning them with brand needs & diversity initiatives.
- Organized technical talks alongside sales and field marketing teams, resulting in a 20% increase in leads.

KALEDIO, Miami, FL

Community Event Manager, 2018-2020

Hedera Hashgraph is a decentralized public network offering a platform for building decentralized applications.

- Managed a global meetup community across 58 cities, overseeing in-person and online events with an average attendance of 40+ members.
- Led the Kaledio ambassador program, enabling the community with education, content creation, and brand resources.
- Successfully executed meetup promotional campaigns, resulting in a 25% increase in attendance, supported by social media and email campaigns.
- Established partnerships with outside developer communities, resulting in cross-promotion and increased event attendance.

HACK MISSOURI, Columbia, Missouri

Logistics Director, 2017-2018

Hack Missouri is an annual, student-run hackathon at the University of Missouri.

- Supervised 900+ attendee events, managing the support of 20+ volunteers.
- Established and supported critical event partnership components, such as sponsorship meet-and-greets, and organized media coverage with local news stations.
- Sourced event locations; worked closely with University department managers to establish clear regulations and guidelines.
