

Transform the uploaded photo into a minimalist hand-drawn paper-cover illustration. Preserve the subjects' facial identity, essential facial features, pose, proportions, silhouette, and family interaction accurately. Simplify unnecessary details using delicate imperfect hand-drawn lines, bold flat acrylic-style color shapes, visible brush marks, and slightly irregular edges. Use a background with plenty of negative space. Keep the family composition small and centered in the Center of the frame. Extract the dominant colors from the original image and use no more than 4 harmonious colors. Quiet, poetic, refined, editorial, handmade aesthetic. Use a background with plenty of negative space. Keep the family composition small and centered in the Center of the frame. Extract the dominant colors from the original image and use no more than 4 harmonious colors.
