

GENIUS DAY

I'm planning a super fun day in Room 206 called "Genius Day." In schools these days, all too often kids aren't allowed to do randomly creative things that show their true genius. This day will fix that.

Throughout the day, all of the kids will have the chance to be in a small group that dismantles an appliance or electronic device to see how it works and what the insides look like. We will also have several other creative opportunities for the kids to work on - including watercolor painting, popsicle stick building, and a huge "Genius Kit" that has a ton of supplies inside to make cool things with - the only limit will be their imaginations.

To make this day happen, I need a couple of things. I need volunteers (see below) to help out the Take Apart Groups. I also need collections of small, random things (preferably in sets of about 30) to add to the Genius kits. Great things for the kits are small things, like washers, screws, buttons, popsicle sticks, stickers, and the like. Don't go buy things, but if you have junk laying around, here is your chance to (a) get rid of it, and (b) put it to good use.

Please send me a note if you can help, and add your name to the list below. Send in any donations for the genius kits with your child or drop them off in our classroom.

Thanks so much - I am super excited about this day, and I hope to make it a monthly occurrence.

Mr. Knaus

Take-Apart Center Volunteers

Come and work with a small group of kids to take apart a small appliance or electronic device. Sign up for as many shifts as you want - two people per time. Tools provided (but bring your own - hand tools only - if you like). No experience necessary - enthusiasm will do nicely!
