

Dogma

Dogma is the main mechanism of evil elites to control, subjugate and enslavement humanity.

-

I will mention three main areas that most strongly inhibit the free development, prosperity, and progress of each individual and all of humanity with their dogmas. These are:

RELIGIOUS DOGMAS,

IDEOLOGICAL DOGMAS,

SCIENTIFIC DOGMAS.

Let us look at some examples of clearly harmful dogmatic influences on the individual, society and civilization.

An educated and supposedly well-informed person should not allow himself to adopt incorrect attitudes and actions under the influence of the Vatican's dogma, which, for example, prohibits him from healing according to the Teachings and Technologies of dr. Grabovoi. And yet, blinded individuals with inconsistent attitudes try to covertly preach about this outrageously wretched and corrupt dogma. Let me say that I am a Gnostic Christian and a practitioner of the Teachings of dr. Grabovoi.

Neoliberal leftists categorically negatively stigmatize neoliberal rightists and vice versa. On the other hand, both uncritically glorify their ideological indoctrination. But the world is not a one-way street and a black and white picture. There are honest, upright and progressive individuals in both camps. Ideological party division is unnecessary, harmful and malicious. I advocate a progressive, non-indoctrinated civilization under the guidance of the wise.

Perhaps the worst malicious oppression is taking place in the field of science and education. Mendeleev still used the term ether, but now ether has been removed from the periodic table. Tesla discovered the possibility of free energy and healing from ether. Today, however, this physical category is banned and removed from education. The official medical doctrine treats humans mechanically, as if we are physical machines...

MSM - corrupt - usurped media faithfully serve to dumb down and lobotomize a large part of humanity with harmful dogmatic lies, which thus become the default truth of an increasingly virtual, or dystopian world. Only a few individuals try to come to their own independent knowledge based on experience, logic, and verification of information. Where is all this leading, everyone who uncritically follows dogmas should ask themselves.
