Action Plan

Lesson 6
11 May 2020

Tasks:
- View Slide 7 of the OFS InSoc Slides again to refresh memory on the Instructions and Expectations for the 'Research' Section of the Research Project
- Continue with the 'Research' Section of the Research Project. Answer the Remaining Conceptual Question and the Debatable Question as Formulated in Lesson 3 using the Note Taking Skills involving writing short sentences in Bullet Points. The answers to each of the questions should be acquired by using at least six Sources (In Total) obtained by searching on the 'Google Chrome' Search Engine.
- Any Additional Useful and Relevant Information that does not fit into any of the Factual, Conceptual, or Debatable Sub-Inquiry Questions can be inserted.
- There should be a URL beside or underneath each set of notes so that it is known from which Website that Specific Information was used from as this will be useful for the creation of the Product in the later Lessons. There should also be an additional List of all the URLs used for all the research underneath all the information on the Google Document to make the generation of the bibliography in the later lessons easier.
- Include Images among the Research labelled with their Figure Numbers, the Source that they came from, and the date that Source was Last Updated.

Resources:
- The OFS InSoc Slides for refreshing memory on the Instructions and Expectations for the 'Research' Section of the Research Project.

- The 'Google Chrome' Search Engine for research to search for sources to use to answer the Conceptual and Debatable Questions Formulated in the Lesson 4.
- The Google Document shared by the teacher in which the Answers for the Conceptual and Debatable Questions Formulated in the previous Lesson will be written.

Deadline:

All the tasks mentioned above must be completed before the start of Lesson 7. If they are not completed by the end of Lesson 6, they will have to be done outside of lesson time but before the start of Lesson 7 on 13 May 2020.

Progress:

I viewed Slide 7 of the OFS InSoc Slides again to refresh memory on the Instructions and Expectations for the 'Research' Section of the Research Project. I completed all of the research required for this research project as I completed the remaining conceptual question, "What are some of the negative effects of anonymity on the Internet?" in the one hour of lesson time provided but took an extra one hour outside of lesson time to complete the debatable question, "To what extent should Anonymity be allowed on the Internet, Considering its Positive and Negative Effects?". No additional information was found as all the information researched fit in with the research questions formulated. In total, I had more than six sources and five images to use in the product. Each point that came from a website has a URL next to it to the website where it came from.
