

My Little Mercenaries

Hey every pony. I'm Astridax one of the co-owners of My Little Mercenaries, a gaming group for Bronies based in the UK. Finally EU bronies can play a game of TF2 without horrible high ping! All of us here at MLM would love you to visit, so why don't you pop into one of our three TF2 Servers. We run 3 TF2 servers, one that is a mostly stock server called Moon with no game changing plugins, one that has insane plugins called Cupcakes.... watch out for the ion cannon and have some fun slaughtering your own team before the round starts, Pinkie Pie did! Be an Engineer and provide awesome 8 bit tunes with the Ponyspenser. We also have a game mode server called Rainbow. A different game mode is planned for each day of the week, 7 colours in a rainbow, 7 days in a week! At the moment we only have Vs Saxton Hale installed, but more will be coming soon. If you'd like a full list of the interesting plugins, visit our site, (links below), click on Servers, and select either Moon, Cupcakes or Rainbow for more info.

All servers have the core Moon plugins, meaning you can expect to see maps at the Night time due to the themes plugins or listen to [Celestia Radio](#) on all our servers! All the IP addresses are below. To connect either add them to your favourites or type in console 'connect IP:PORT, replacing IP and Port with the ones below.'

But that isn't all. We are also getting Minecraft and Terraria servers! We did have a Minecraft server, but we removed it in anticipation of the new 1.8 update. So keep your eyes peeled, we are gonna hit the ground running with that one.

If you'd like to keep up with us so you know as soon as any change happens, SUCH AS THE MINECRAFT SERVER. Either join our [steam group](#), visit our brand new [website](#), Or an even better idea; be part of the community and join our [forums](#)! If you prefer voice chat, grab [mumble](#) and join our mumble server by clicking on here <mumble://109.169.46.186:64738/?version=1.2.0> (Note I couldn't get this link to work in chrome. It doesn't like mumble://, so look below for the IP.)

BIRTHDAY MODE AND PONYSPENSER ON ALL SERVERS DURING THE WEEK OF SEASON 2 LAUNCH!

Here are some videos to show what insane things can happen on the MLM servers:

On another note. We are looking for admins and moderators to help with both the TF2, Minecraft and most definitely Terraria! If you'd like to apply, please either PM Astridax or Rainbow Dash on the forums, join the steam group chat or forum chat and show your interest, or come onto Mumble and nag me a bit XD. There will be interviews, so prepare yourself. Dash will conduct the Minecraft and Terraria ones, me and Silent will conduct the TF2 ones.
