

INTENTION MAP

Identify Three Key Pieces of Empathy Evidence that Helped You to Meet Your Users' Needs

Design Feature (pic, vid or description)	Empathy Evidence (Survey/ Interview Data screenshot, pic, timestamp, or text)	How did your empathy evidence inform your design feature and help you meet your users' needs? (Write or Record - include link here)	What changes might you make to this feature in a future iteration? (Write or Record - include link here)
	<p>2:34 "I love being in the mountains, pretty much alone, but able to snowboard; I'd love to be able to run the lift myself"</p>	<p>I came up with a mountain ski slope for my user because she told me that is when she feels the best. She really wants to be independent so I made sure there were no other people around"</p>	<p>I really think I need to design a ski lift that runs on its own</p>
