Meet Mrs. Revis...

All about me...

I'm the oldest of four children. I grew up on a dairy farm near West Branch. I graduated from Ogemaw Heights. I attended Kirtland Community College for two years before transferring to SVSU. My major was elementary education, and my minors were English and math. I worked at a deli and then became a manager of the shoe department at Kmart in Grayling while attending college. I met my husband at church. We have been married for 14 years. My husband is a paramedic for Mid-Michigan Health-Gladwin. We have three wonderful boys who all attend school here: Brayden in 6th grade, Clayton in 4th grade, and Grayson is in Young 5s. I don't have much spare time during the school year between teaching and being a mom and soccer. We took the vacation of a lifetime this past summer to Alaska for 17 days. We flew into Anchorage and rented an RV. We went to Seward, Homer, Palmer, Fairbanks, and Denali. It was absolutely

amazing!!!

Years Taught: This is my 22nd year teaching at Beaverton Schools.

My WHY for teaching...

I teach because I've always been a teacher from the time I became a big sister (when I was 5). I used to teach my siblings, cousins, and imaginary students as a little girl. Some kids have imaginary friends; I had imaginary students. I would play school for hours at my grandparents' house in their spare bedroom. I once even set up a classroom for my cousins and siblings in the corn crib on our dairy farm. I truly LOVE to teach. It is hard work and challenging and tiring, and there have been times since having my own children that I've wondered and doubted if I could keep teaching. However, the rewards of teaching are so amazing. The growth that my students make in a year is amazing to watch--especially in kindergarten. To watch kids who don't know letters grow to be readers and writers is very powerful! I've had the opportunity to be a part of hundreds of kids' educational journeys, and I've tried to help them become responsible and respectful people who will be successful in life.
