

Anatomical Overview Vocabulary

abdominal cavity

anatomical position

anatomy

anterior

atoms

Cardiovascular System

cells

cellular composition

concentration gradient

control group

controls

cranial cavity

deep

development

Digestive System

distal

dorsal

double-blind method

down the gradient

effector

electrical gradient

electrochemical gradient

Endocrine System

evolution

experimenter bias

fact

falsifiability

feedback loops

frontal plane

gradient

growth

histology

holism

homeostasis
hypothetico-deductive method
inductive method
inferior
integrating (control) center
Integumentary System
lateral
law of nature
lumen
Lymphatic System
medial
mesentery
metabolism
molecules
movement
Muscular System
negative feedback
Nervous System
opposable
organ systems
organelles
organism
organism
organization
peer reviews
pelvic cavity
pericardium
peritoneum
physiology
placebo
pleura
positive feedback
posterior
prefix

prehensile
pressure gradient
proximal
receptor
reductionism
reproduction
Reproductive System
Respiratory System
responsiveness
sagittal plane
sample size
Scientific method
section
serous membranes
Skeletal System
statistical testing
stereoscopic
stimuli
suffix
superficial
superior
theory
thermal gradient
thoracic cavity
tissues
transverse plane
up the gradient
Urinary System
ventral
