Abstract: Do not replace the word "abstract," but do replace the rest of this text. The abstract should be approximately 100 words. It should give a summary of the full paper, including the results and conclusions.

Keywords: Enter a maximum of 5 keywords

1. Introduction

The section heading will be in Times New Roman 12 font size. Leave 6 pt space after the headings. The main text will be in Times New Roman 10 font size. Please provide an indent (0.2 inch) at the beginning of each paragraph. Give a single line spacing before inserting a figure.

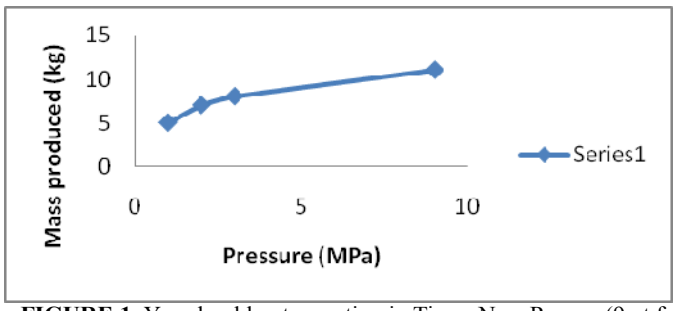

FIGURE 1. You should put a caption in Times New Roman (9 pt font size)

2. Related work

The literature survey on this topic citing previous works should appear here.

3. Proposed Method/Main Contribution

All the sections will have a similar style. The subsection heading will be of font size 12.

3.1 Tables

There should be one line spacing above and below the table. No need to provide grid lines.

TABLE 1. This is the Style for Table Captions. All text should be 9 pt. The text "TABLE 1," which labels the caption, should be bold and capitalized. Center this text above the table. Tables should have top and bottom rules and a rule separating the column heads from the rest of the table only.

Column Header Goes Here	Column Header Goes Here	Column Header Goes Here
Row Name Here	x	X
Row Name Here	x	X
Row Name Here	x	X

3.2 Equations

All the equations should be numbered and centered. An example is shown below:

$$F_{pL}\left(X_1, X_2\right) = p_{Loss} = \sum_{i,j \in N} G_{ij}\left[V_i^2 + V_j^2 - 2V_i V_j \cos cos\left(\delta_i - \delta_j\right)\right] \quad (1)$$

All the variables in the equation should be in italics. The variables should be explained at their first use. Like in Eq. (1), *d* is the grain diameter.

3.3 How to cite equations, tables, figures, and references in the main text

There should not be any non-referred equation, table, figure, or reference. In this sample paper, Eq. (1), Fig. 1, and Table 1 have been presented. Arrange the references alphabetically and cite by the author's name and year.

3.4 Margins

The top margin is 1.2 inch, left 1.5 right, top and bottom: 1 inch

3.5 Page length

Approximately about 3500 words

4. Conclusions

Here only broad guidelines have been provided. Please use your judgment for minor formatting details. The format should be consistent, and the paper should be free of errors.

Acknowledgments

The reference section will follow the "Acknowledgment." References should follow the format as indicated in the below examples. All the references should be cited in the text. The font size should be 9 pt for references.
