Mi-grant: Empowering Migrants Globally with Blockchain.

Introduction

- **Global Migrant Impact**: While 304 million migrants contribute to economies and cultures, 167.7 million face legal obstacles, isolation, and exploitation.

- **About MI-grant**: MI-grant is a community-led blockchain project that uses the **$GRANT token** to empower migrants with a sense of belonging. It is about unity through community, where every Migrants' hard work is recognized and they are supported.

- **Focus**: This paper investigates migrant difficulties, MI-grant solutions, and its vision for a more equitable future.

Migrant' Difficulties

Migrant workers contribute to global economies by sending **($702 billion)** home each year, despite organizational hurdles.

1. **Exploitation**
    - Fear of deportation, dangerous working conditions, and wage fraud (World economic forum).

2. **Health Hazards**
    - Toxic working conditions limit access to healthcare (WHO).

3. **Legal Limitations**
    - Insufficient documentation increases vulnerability. (PMC).

4. **Economic Stress**
    - Migrant earnings transfer might reach 7%. (World Bank).

5. **Social exclusion**
    - Loneliness results in depression (PMC).

6. **Problems with language**
    - 60% of migrants battle with the spoken dialect, which limits their employment options.

7. **Gender Discrimination**
    - 64.9M female migrants suffer from this (WHO, 2022).

8. **Unstable Work**
    - Low-paying, unpredictable work is bad for mental health (PMC).

Global Facts & Issues

Category	Statistic	Main Issue
Migrant Workers	167.7M	Exploitation
Total Migrants	304M	Health risks
Female Migrants	64.9M	Gender challenges
Remittances	$702B	High fees
Africa Region	15.5M	Social isolation

The Migrant’s Struggle

- Devalued work and poor pay.
- Communication issues limit options.
- Legal uncertainty blocks steady employment.
- Isolation from native community.

Migrant need: Community with no constraints on location.

MI-grant's Solution: Blockchain for Change

A decentralized platform / community where migrants build solutions together.

Key Features

1. **Community Networks**
    - Partnerships with other global blockchain projects, that share the same interests

2. **Digital Training**
    - Language, tech, and courses.

Why Blockchain?

- **Web3 Momentum:** The rise of Web3 empowers decentralized, user-led systems—perfect for migrant-driven solutions.

- **Transparency and Trust**: Blockchain secures and validates contributions and partnerships.

- **Global Accessibility and adoption**: Its borderless nature connects migrants and supports $GRANT adoption.

- **Community-Driven Innovation**: Migrants drive solutions through active participation.

The $GRANT Token: Fueling the Revolution

- **Utility**:
    - Ability to govern for migrants.
    - A self-sufficient ecosystem working with other projects that believe in uniting Migrants worldwide.

- **Philosophy**: *“Your hard work is a GRANT you give everywhere”* (grantoken.info).

Conclusion

MI-grant uses blockchain technology for Community-driven progress prioritizing the voices of migrants regardless of colour and where they come from

Join the movement: *“Every voice matters, every contribution counts.”* (grantoken.info).
