Math 7

Work From Home Information

What you will need:

- Access to the internet (Very little data will be used)
- A screen to display a digital textbook
- A notebook and writing utensils

Every week you will be sent a document through email (it will also be posted to Google Classroom). The document will contain the expectations to complete. Do as much of the document as you can.

If you have questions or get stuck, please post your question for other students to see in the Google classroom under the appropriate week discussion. I will also be able to help answer questions, but you might be surprised to see how helpful your classmates are.

It is important that you try as much as possible. You may not be able to complete everything, but it is more about the practice than the completion. If you find the material starts to become really difficult, work on one of the extra pieces for the week.

If you do not have access to the internet, you can be supplied with a textbook. You will not have to provide any work to me, but you are encouraged to do the practice tests in the textbook.
