

Photos from the Yellow Knolls Hike - 04-02-22

New Promise Hikers completed a hike on the Yellow Knolls trail, up to the High Point trail. The views were excellent, with plenty of flowers, vistas, and most importantly, the Yellow Knolls and rock formations that truly make it special. Overall, a wonderful hike and we even surprised an approximately 6-1/2 foot rattlesnake that cut our hiking trip a bit short. It had just killed a mouse and was very angry about us being on its trail at that time! Made for a great photo though... Click on the following links for pictures.
