## 1. Introduction

This section describes the background of the study carried out, both theoretical background and application needs. It is necessary to highlight the factors that can be used to justify why this study is exciting or necessary and the expected contribution. Describe the purpose of the study in the form of a coherent and systematic paragraph.

This section describes the background of the study carried out, both theoretical background and application needs. It is necessary to highlight the factors that can be used to justify why this study is exciting or necessary and the expected contribution. Describe the purpose of the study in the form of a coherent and systematic paragraph.

## 2. Literature Review

The literature review contains a synthesis of various concepts/theories according to the topic of the article/manuscript. The theoretical framework used is included in the literature review section. The reference library used must use the latest references and prioritize references from related scientific journals that are accredited and reputable. Write down all the references used in the bibliography according to the established standards.

Write down all the references used in the bibliography according to the established standards.

## 3. Methods

This section describes the methods used in this study. The author needs to describe the reasons used to justify using these methods and describe them adequately, including why

other alternative methods were not chosen. This section is also used to describe the types and sources of data used and the analysis process.

This section describes the methods used in this study. The author needs to describe the reasons used to justify using these methods and describe them adequately, including why other alternative methods were not chosen. This section is also used to describe the types and sources of data used and the analysis process.

This section describes the methods used in this study. The author needs to describe the reasons used to justify using these methods and describe them adequately, including why other alternative methods were not chosen. This section is also used to describe the types and sources of data used and the analysis process.

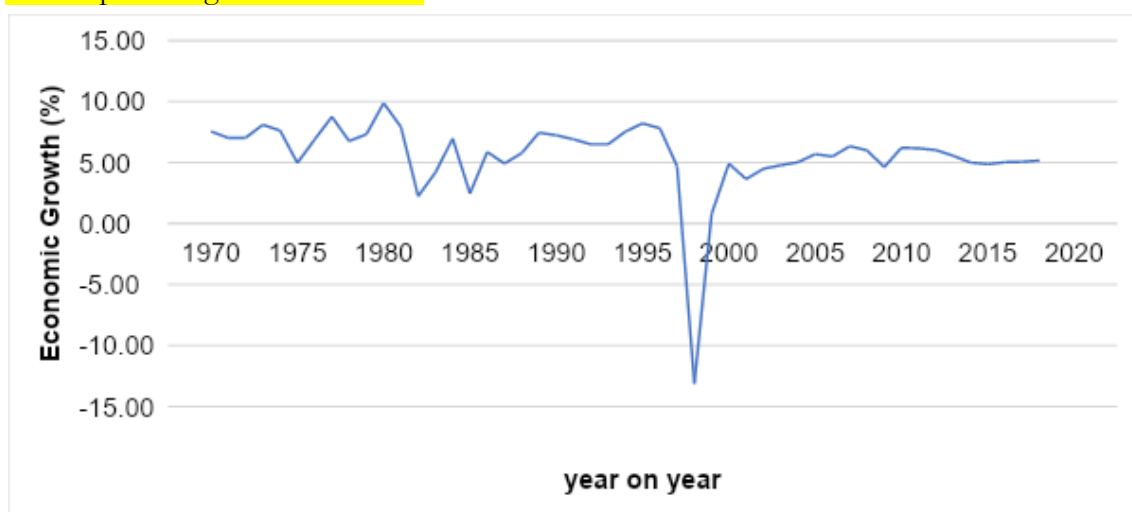

#### 4. Results and Discussion

This section describes and discusses the results of the analysis. The author can use Tables or Figures to present the results of the analysis. The description of the analysis and discussion results should be presented coherently and systematically so that it is easy to follow.

This section describes and discusses the results of the analysis. The author can use Tables or Figures to present the results of the analysis. The description of the analysis and discussion results should be presented coherently and systematically so that it is easy to follow.

This section describes and discusses the results of the analysis. The author can use Tables or Figures to present the results of the analysis. The description of the analysis and discussion results should be presented coherently and systematically so that it is easy to follow.

## 5. Conclusions and Recommendations

This section presents the conclusions obtained from the description and discussion or discussion results of the study. Describe the conclusion in the form of a coherent and systematic paragraph. Recommendations should be based on the results of the analysis and conclusions that have been made.

This section presents the conclusions obtained from the description and discussion or discussion results of the study. Describe the conclusion in the form of a coherent and systematic paragraph. Recommendations should be based on the results of the analysis and conclusions that have been made.

## Acknowledgments

This section is used for acknowledgment and gratitude for those who have contributed to the research, both in funding support, substance, and other aspects.

## References

This section presents a bibliography that is used as a reference source for articles in the body of the paragraph. Writing the bibliography follows the standards of the American Psychological Association (APA), and we highly recommend using reference software such as: Mendeley, EndNote and others.
