

HIEROLENS

Privacy Policy · Last updated: April 2026

DATA WE COLLECT

HieroLens does not collect or store any personal information. Your scan history is stored exclusively on your device using SwiftData and is never transmitted to us or any third party.

CAMERA & PHOTO LIBRARY

HieroLens requests access to your camera and photo library solely for the purpose of photographing hieroglyphs for identification. Images are processed locally and, when you tap Identify, are sent securely to Replicate's API for AI analysis.

THIRD-PARTY AI SERVICE

When you use the Identify feature, your image is sent to Replicate (replicate.com) which uses Google's Gemini model to analyze it. This is the only external service used. Replicate's privacy policy applies to data processed through their API. We do not receive or store any data from this interaction. Images are processed in real time and are not retained by the service after generating results.

ENCYCLOPEDIA DATA

The Gardiner Sign List encyclopedia is bundled with the app and works entirely offline. No network connection is required to browse hieroglyphs.

NO ACCOUNTS

HieroLens requires no account, login, or registration of any kind.

NO TRACKING OR ANALYTICS

HieroLens does not use any analytics, advertising, or tracking frameworks. We do not track your usage or behavior in any way.

CHILDREN'S PRIVACY

HieroLens does not collect data from anyone, including children under 13. The app is safe for all ages and educational use.

CHANGES TO THIS POLICY

We may update this privacy policy from time to time. Any changes will be reflected in the app and on this page.

CONTACT

For any privacy-related questions, please contact us through the App Store support link on the HieroLens product page.
