

Article #012 -
Humanity in Adversity
Humanity in Dark Places
Humanity through Education

My teachers used to say, "In the world, one can steal a pot of knowledge." After thinking about it for years, I understood knowledge to be as common as any staple of living. But knowledge was also rare. Sometimes knowledge was only as good as the person who had it. Knowledge in the wrong hands could be bad.

After much thought, I understood what knowledge was and gained it. I led my life into a better position. Humanity is activated by being well-educated. If there is humanity in man, then he can do and give something good for the people of society. Sometimes knowledge is only as good as the person who wields it.

I look all around me and realize that, as much as I have achieved humanity through education, so have the people around me. It worries me. My strong wish is that my community can think like me and achieve humanity in order to take the people of the camp to a position of progress. I believe that achieving humanity can show the people of society a good position. But it is hard to see.

Due to the lack of higher educational institutions in the camp, my education is being stopped. Almost all of the children in the camp are being deprived of education. I wish to see more educational avenues as the answers to our problems.

Sincerely,
Rajida Akte
