LINDEN ROSELLE SEWERAGE AUTHORITY-DESCRIPTION

The Linden Roselle Sewerage Authority ("The Authority") is a local public body created in 1948 by the City of Linden and Borough of Roselle under the "Sewerage Authorities Law" (N.J.S.A.40:14A-1 et seq.) It was established to contract and operate wastewater treatment and interceptor facilities to collect, treat and dispose of sewerage generated by the municipalities under a Municipal Agreement dated December 6, 1949 and as later amended.

The Authority operations are overseen by the six Members of the Board and day to day operations and administration are conducted by a staff headed by an Executive Director.

The Authority's service area is 13 square miles, and it services a residential population of 60,000. Approximately 19% of the influent sewerage flow is from industrial sources.

The Authority is governed by federal and state regulation. It operates its facilities and discharges treated wastewater to the Arthur Kill under permit No. 0024953 issued by the New Jersey Department of Environmental Protection (N.J.D.E.P). A portion of the effluent is permitted for beneficial reuse for cooling water for electric power generated at an adjacent power plant.

The Authority employs 43 people in four departments:

- Administration – Business
- Monitoring – Environmental Compliance
- Operations
- Maintenance

The Authority owns administration, monitoring/laboratory, treatment facilities and various auxiliary buildings at its primary site at 5005 South Wood Ave., Linden, NJ. It also owns a dock facility at the Arthur Kill and various metering pumping stations and pipelines outside of its treatment plant site.

The Authority's sewerage treatment is classified as "Secondary Treatment" and is designed to treat 17 million gallons per day. It consists of Primary sedimentation, roughing filters, activated sludge, aeration, secondary clarifiers and ultraviolet disinfection for final effluent.

Residuals (sludge) treatment is by gravity thickening of primary sludge, gravity belt thickening (for waste activated sludge). Residuals are anaerobically digested and resulting methane gas is utilized for heat or flared (incinerated). Residual sludge is concentrated with Polymer. Final residuals are removed and disposed of off-site by a private contractor. The Authority's 2023 operating budget is approximately \$10,413,142.00.

To register: Businesses must complete **Form NJ-REG** and submit it to the Division of Revenue. The form can be filed online or by mailing a paper form to the Division. Online filing is strongly encouraged.
