

Life Topic Unit 9: Do Aliens and UFOs Exist?

Name _____

1. For thousands of years, people looking into the sky have asked if there is life on other planets. On any clear evening it is possible to see many stars. Many of those stars are other planets and suns larger than those in our own ¹ _____. In 2009 ² _____ from England found that our galaxy could hold as many as 38,000 planets which may not only support life but also have ³ _____. As ⁴ _____ improves, we will be able to see further, helping our search for life on other planets.

2. UFO stands for “⁵ _____ Flying Object,” or a ⁶ _____ from another planet. As many as a third of Americans believe in UFOs. Many who say that they have UFOs have really seen only weather balloons, airplanes, planets, or other flying objects. But five percent of these sightings cannot be explained.

3. Each year hundreds of people in Britain ⁷ _____ they have seen UFOs. In 1996 there were 600 reports by everyone from pilots to police officers to schoolchildren. In 2008 the British government released thousands of pages of UFO reports. For example, in 1995 two boys claimed they had been standing under a UFO and an ⁸ _____ with a head ⁹ _____ a lemon said, “We want you to come with us.”

4. In a small town in Texas in January 2008, about forty people saw an object ¹⁰ _____ in the sky for a few minutes. It was as big as a large building, had a red glow and was round with bright red, yellow, and white flashing lights. It made no sound, and left very quickly. Then it returned, and left quickly again.

Life Topic Unit 9: Do Aliens and UFOs Exist? (Key)

1. For thousands of years, people looking into the sky have asked if there is life on other planets. On any clear evening it is possible to see many stars. Many of those stars are other planets and suns larger than those in our own ¹galaxy. In 2009 ²scientists from England found that our galaxy could hold as many as 38,000 planets which may not only support life but also have ³intelligent civilizations. As ⁴technology improves, we will be able to see further, helping our search for life on other planets.

2. UFO stands for “⁵Unidentified Flying Object,” or a ⁶spaceship from another planet. As many as a third of Americans believe in UFOs. Many who say that they have UFOs have really seen only weather balloons, airplanes, planets, or other flying objects. But five percent of these sightings cannot be explained.

3. Each year hundreds of people in Britain ⁷claim they have seen UFOs. In 1996 there were 600 reports by everyone from pilots to police officers to schoolchildren. In 2008 the British government released thousands of pages of UFO reports. For example, in 1995 two boys claimed they had been standing under a UFO and an ⁸alien with a head ⁹shaped like a lemon said, “We want you to come with us.”

4. In a small town in Texas in January 2008, about forty people saw an object ¹⁰hover in the sky for a few minutes. It was as big as a large building, had a red glow and was round with bright red, yellow, and white flashing lights. It made no sound, and left very quickly. Then it returned, and left quickly again.
