Bloom is a real-time, narrative-driven social sim about starting up a flower shop made exclusively for Playdate. Tend to Midori's garden while texting friends and family as she starts a new chapter of her life. The game takes place over many real-life days.

How do I get a review copy?

Contact us at rngpartygames@gmail.com or message us on Twitter @RNGParty. We'll be prioritizing reviewers with physical hardware for now! Also, we'd love to talk! Please don't hesitate to contact us if you have any questions at all.

How do I enter review mode?

Review mode is designed for reviewers to play the game in a shorter time span, it speeds up the major gameplay progression and flower growth by 30x.

How to enable: In the Settings app (bottom right gear icon after bringing up the phone), hold A then press B. You will hear a sound, scroll to the bottom of the list and set **Review Mode** to **On**.

I encountered a bug!

Please let us know by sending details to rngpartygames@gmail.com, messaging us on Twitter @RNGParty, or joining our Discord.

How is the game played?

Bloom has two main views: the room and the roof. In the room, you can open the phone menu, which allows you to do things such as answer texts, buy flowers, pay rent, check the weather forecast, and more. On the roof, you can plant, water, and dig up flowers.

Plant flowers, answer texts, and check back again later as real-world time passes to see what's new.
