## 1. INTRODUCTION

The purpose of Church emergency response efforts is to relieve suffering following disasters by providing life-sustaining resources and support. Area and stake priesthood leaders direct Church emergency preparation and response efforts. They coordinate closely with their assigned area welfare and self-reliance manager.

This ward emergency plan should be reviewed and updated regularly. The ward council, ward emergency preparedness coordinator should ensure that this plan is up-to-date.

### 1.1 Church Emergency Planning Resources

The following resources are available to help stake leaders develop emergency plans and prepare for emergencies:

- **Emergency Response Procedures (Detailed Guidelines)**  
<https://www.churchofjesuschrist.org/study/manual/emergency-response/emergency-response-procedures-detailed-guidelines?lang=eng#p1>
- **Emergency Response**  
<https://www.churchofjesuschrist.org/callings/safety/emergency-response?lang=eng>
- **Stake and Ward Emergency Preparedness Planning Guide**  
<https://providentliving.churchofjesuschrist.org/emergency-preparedness-and-response/stake-ward-emergency-planning-guide?lang=eng>
- **Emergency Communication Guidelines**  
<https://www.churchofjesuschrist.org/study/manual/emergency-response/emergency-communication-guidelines?lang=eng#p105>
- **Emergency Response Procedures (Detailed Guidelines)**  
<https://www.churchofjesuschrist.org/search?facet=all&lang=eng&page=1&query=emergency+response>
- **Introduction: Stake and Ward Emergency Preparedness Guide**  
<https://www.churchofjesuschrist.org/search?facet=all&lang=eng&page=3&query=emergency+response>
- **Utah Area Temporal Preparedness Guide**  
<https://www.churchofjesuschrist.org/bc/content/shared/english/life-help/Temporal-Preparedness-Guide-Utah-Area-Guide-May-2021.pdf?lang=eng>

### 1.2 Community Emergency Planning Resources

- **Washington County Emergency Management plan**  
[https://www.google.com/search?q=be+ready+utah&rlz=1C1GCEU\\_enUS988US988&oq=be+ready+utah&gs\\_lcrp=EgZjaHJybWUyCQgAEFEUYORiABDIHCAEQABiABDIICAIAQABgWGB4yCAgDEAAyFhgeMgoIBBAAGIAEGKIE0gEJOTU2MWowajE1qAllsAIB&sourceid=chrome&ie=UTF-8](https://www.google.com/search?q=be+ready+utah&rlz=1C1GCEU_enUS988US988&oq=be+ready+utah&gs_lcrp=EgZjaHJybWUyCQgAEFEUYORiABDIHCAEQABiABDIICAIAQABgWGB4yCAgDEAAyFhgeMgoIBBAAGIAEGKIE0gEJOTU2MWowajE1qAllsAIB&sourceid=chrome&ie=UTF-8)
- **Utah Department of Public Safety Emergency Management**
- **Be Ready Utah** (excellent website for family emergency plans, communication plans, 72-hour kits, earthquake preparedness, flood preparedness, car survival, etc.)

[https://www.google.com/search?q=be+ready+utah&rlz=1C1GCEU\\_enUS988US988&oq=be+ready+utah&gs\\_lcrp=EgZjaHJvbWUyCQgAEEUYORiABDIHCAEQABiABDIICAQABgWGB4yCAgDEAAYFhgeMgoIBBAAGIAEGKIE0gEJOTU2MWowajE1qAllsAIB&sourceid=chrome&ie=UTF-8](https://www.google.com/search?q=be+ready+utah&rlz=1C1GCEU_enUS988US988&oq=be+ready+utah&gs_lcrp=EgZjaHJvbWUyCQgAEEUYORiABDIHCAEQABiABDIICAQABgWGB4yCAgDEAAYFhgeMgoIBBAAGIAEGKIE0gEJOTU2MWowajE1qAllsAIB&sourceid=chrome&ie=UTF-8)

- **Federal Emergency Management Agency (FEMA)**

## **2.0 LIKELY DISASTERS**

The types of disasters most likely to occur in St. George City include earthquakes, fires, floods, weather-related emergencies, and chemical spills. The Stake Council and emergency preparedness specialists should consider each type of disaster and identify specific response actions that could be needed.

Localized emergencies are those that affect only a few homes and families. In these cases, it is expected that communications will be normal and that local resources (neighbors, fire department, hospitals, etc.) will be available to respond. Widespread emergencies are those that affect many homes or the entire community. In these cases, it is expected that communications are impacted and that local resources may not be available.

### **2.1 High Winds and Other Climate Hazards**

St. George is prone to the effects of severe weather. These are usually thunderstorms. The city is also prone to severe windstorms referred to as “East Winds.” Severe storms result in secondary problems dealing with power, heating, and travel.

### **2.2 Floods**

The potential for flooding due to spring runoff and especially from summer thunderstorms is high in St. George City. Aging agriculture irrigation canals are prevalent throughout Washington County. As farmlands are developed, the infrastructure remains to supply water to farmers downstream. These canals can fail, inundating down slope property. St. George Santa Clara Field Canal Company maintains a large irrigation ditch running through St. George City along the southern hillside. Any incident causing a break in this line would likely result in massive flooding.

As farmlands are developed, the infrastructure remains to supply water to farmers downstream. These canals can fail, inundating down slope property. St. George Santa Clara Field Canal Company maintains a large irrigation ditch running through St. George City along the southern hillside. Any incident causing a break in this line would likely result in massive flooding.

### **2.3 Dam Failure**

There is one (1) water feature affecting Green Valley that is considered to be a dam. This is an open irrigation reservoir.

There is one water feature affecting Green Valley that is considered to be a dam. This is an open irrigation reservoir.

### **2.4 Earthquake**

Washington County is located in the Southwestern corner of Utah. Major traffic arteries run north and south of the county. A major earthquake in the area would result in loss of life and in millions of dollars in damage to residential structures, businesses, industries, and critical infrastructure.

Washington County is located in the southwestern corner of Utah. Major traffic arteries run north and south of the county. A major earthquake in the area would result in loss of life and in millions of dollars in damage to residential structures, businesses, industries, and critical infrastructure.

## **2.5 Soil Liquefaction**

Liquefaction occurs when there is a sudden large decrease in shear strength of sandy soils caused by the collapse of the soils structure, in which the soil loses its bearing capacity, and also by a temporary increase in pore-water pressure, or water saturation during earthquake ground shaking. Liquefaction is common in areas of shallow ground water and sandy or silty sediments. The result is that soils will flow even on the gentlest of slopes. Lateral spreading is a type of failure that results in surficial soil layers breaking up and moving up to three feet (3') or more, independently over the liquefied layer. On slopes more than five percent (5%), flow failures can move miles of soil at up to tens of miles per hour. On slopes less than 0.5 percent the bearing capacity will lessen and can cause buildings to settle or tip. No matter the slope percent, ground cracking and differential settlement will occur. Liquefaction can also cause foundation materials to liquefy and fail and/or cause sand boils. Sand boils are deposits of sandy sediment ejected to the surface during an earthquake along fissures. Liquefaction can occur during earthquakes of magnitude 5.0 or greater.

Liquefaction occurs when there is a sudden large decrease in shear strength of sandy soils caused by the collapse of the soils structure, in which the soil loses its bearing capacity, and also by a temporary increase in pore-water pressure, or water saturation during earthquake ground shaking. Liquefaction is common in areas of shallow ground water and sandy or silty sediments. The result is that soils will flow even on the gentlest of slopes. Lateral spreading is a type of failure that results in surficial soil layers breaking up and moving up to three feet (3') or more, independently over the liquefied layer. On slopes more than five percent (5%), flow failures can move miles of soil at up to tens of miles per hour. On slopes less than 0.5 percent the bearing capacity will lessen and can cause buildings to settle or tip. No matter the slope percent, ground cracking and differential settlement will occur. Liquefaction can also cause foundation materials to liquefy and fail and/or cause sand boils. Sand boils are deposits of sandy sediment ejected to the surface during an earthquake along fissures. Liquefaction can occur during earthquakes of magnitude 5.0 or greater.

## **2.6 Shortages**

The shortage of energy, food, and water supplies could threaten the welfare of the citizens of St. George. The dependency upon out-of-state resources can become a problem when normal deliveries are interrupted.

## **2.7 Power Outages**

Power outages are a common occurrence and are generally short lived. In the event of an extended outage, the Fire Stations are equipped with backup generators. The city also has one portable generator that can be used for various needs.

Power outages are a common occurrence and are generally short lived. In the event of an extended outage, the Fire Stations are equipped with backup generators. The city also has one portable generator that can be used for various needs.

## **2.8 Pandemic**

COVID, influenza or other pandemic could substantially disrupt the community. Potential consequences include severe stress on the ability of hospitals and health care providers to care for the sick and disruption of essential community services. Slowing the spread of the pandemic virus could potentially reduce the number of people who become ill. Measures to slow the spread of the pandemic virus which themselves interrupt community activities (e.g., school closures, home isolation/quarantine, event cancellations, facility closures) can have adverse economic and social effects.

### 3.0 EMERGENCY PLANS AND CRITICAL INFORMATION

#### 3.1 Ward Emergency Plans

The ward should maintain a simple on-line plan to prepare for and respond to emergencies. The Church's [Stake and Ward Preparedness Planning Guide and Worksheets](#) should be used along with other available resources. Ward plans should be coordinated with plan of the Stake and community. Leaders should consider calling welfare specialists to assist with emergency response efforts.

As part of their emergency plans, the ward should maintain the following critical information:

- Emergency Contact Information
- Church and Community Resources
- Ward Map
- Members and Neighbors with Special Needs
- Equipment, Skills, and Communication Resources

#### 3.2 Emergency Contact Information

Each leader and family should have readily available the contact information for local emergency resources, family members and nearby neighbors.

##### Stake Emergency Planning

Scott Gubler, Stake Emergency Preparedness Coordinator .....	See Tools App
Brooke Brown Stake Relief Society President .....	See Tools App
Communication Specialist .....	See Tools App
Emergency Coordination Locations.....	Stake Center or ward meetinghouses
FRS Radio Channel for Stake and Ward Leaders .....	<b>Channel 7-35</b>

### 3.3 Ward Map

Stake Center – Stake emergency coordination location

Other Meetinghouses – As needed

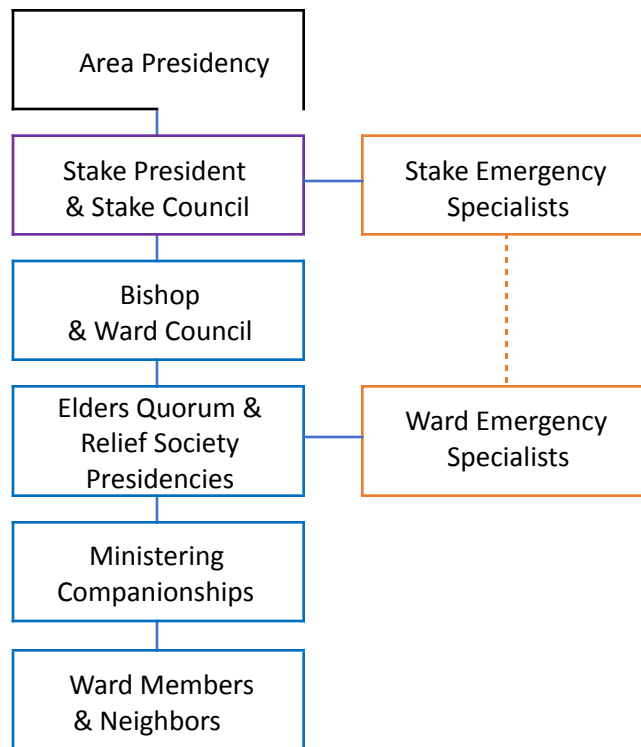

### **3.4 Equipment, Skills, and Communication Resources**

Each ward should identify members and neighbors with equipment or skills (such as medical or emergency response training) that would be useful in emergency response or cleanup efforts. The stake will gather and organize this information and make these lists available in times of need. For example:

Ward	Skill or Equipment	Name/Location	Contact Info
	Block Captain or RDAP Training		
	First Aid Training		
	CPR Training		
	Dewatering Pump		
	Blowers & Fans		
	Other		

## 4.0 ASSIGNMENTS AND PROCEDURES

Area leaders provide disaster warning, preparation information, response plans, and necessary assistance to the stake. The stake president oversees Church emergency preparation, communication, and response within the stake. The bishop oversees preparation, communication, and response at the ward level. Stake and ward emergency specialists assist the stake president and bishops to prepare for and respond to emergencies. Stake and ward service coordinators may also be utilized to coordinate temporal assistance.

### 4.1 Area Presidency and Area Seventy

Before an Emergency (Preparation)	After an Emergency (Response)
<ul style="list-style-type: none"><li>• <i>Provide disaster warnings, preparation information, and response plans.</i></li></ul>	<ul style="list-style-type: none"><li>• <i>Coordinate with stake president to provide needed assistance.</i></li></ul>

## 4.2 Stake Presidency and Stake Council

*With assistance from the stake emergency coordinator and emergency specialists.*

Before an Emergency (Preparation)	After an Emergency (Response)
<ul style="list-style-type: none"><li>• <i>Develop and maintain a stake emergency plan and be prepared to implement the plan.</i></li><li>• <i>Ensure that each ward has an updated emergency plan and is prepared to implement the plan.</i></li><li>• <i>Coordinate and cooperate with Church and city emergency planners and responders.</i></li><li>• <i>Provide training for ward emergency coordinators.</i></li><li>• <i>Gather stake emergency contact information, those with special needs, available resources, etc.</i></li><li>• <i>Teach self-reliance, temporal preparedness, and emergency preparedness skills and principles.</i></li><li>• <i>Encourage stake and ward members to develop a family emergency plan and gather emergency supplies (see Section 6).</i></li></ul>	<ul style="list-style-type: none"><li>• <i>Implement the stake emergency plan.</i></li><li>• <i>Oversee stake assessment and relief efforts through ecclesiastical and community channels.</i></li><li>• <i>Provide support for bishops and other ward leaders to assess critical needs and provide immediate relief.</i></li><li>• <i>Locate and provide needed resources such as water, food, shelter, sanitation, etc.</i></li><li>• <i>Provide necessary long-term support and relief through the Elders Quorum and Relief Society organizations.</i></li><li>• <i>Report the conditions and needs of stake members to the Area Seventy or Area Presidency.</i></li></ul>

## 4.3 Bishopric and Ward Council

*With assistance from the ward emergency coordinator and emergency specialists.*

Before an Emergency (Preparation)	After an Emergency (Response)
<ul style="list-style-type: none"><li>• <i>Review the stake emergency plan and develop a simple ward emergency plan.</i></li><li>• <i>Oversee the efforts of the Elders Quorum and Relief Society presidencies to implement the ward emergency plan.</i></li><li>• <i>Help individuals and families become self-reliant and prepare for emergencies (see Section 6).</i></li><li>• <i>Help gather neighbor contact information, identify those with special needs, and identify neighbors with skills that could</i></li></ul>	<ul style="list-style-type: none"><li>• <i>Implement the ward emergency plan.</i></li><li>• <i>Oversee ward assessment and relief efforts.</i></li><li>• <i>Work with the Elders Quorum and Relief Society presidencies to provide immediate assessment and relief.</i></li><li>• <i>Help to locate and reunite family members who have become separated.</i></li><li>• <i>Provide needed accommodations such as water, food, shelter, sanitation, etc.</i></li><li>• <i>Provide necessary long-term recovery and relief.</i></li><li>• <i>Report the conditions and needs of ward members to the Stake President.</i></li></ul>

<i>help with response and recovery (medical, equipment, utilities, etc.)</i>	
------------------------------------------------------------------------------	--

#### 4.4 Elders Quorum and Relief Society Presidencies

Before an Emergency (Preparation)	After an Emergency (Response)
<ul style="list-style-type: none"> <li>• <i>Review and be prepared to implement the ward emergency plan.</i></li> <li>• <i>Oversee the efforts of the ward emergency preparation coordinator and emergency specialists, if called.</i></li> <li>• <i>Help individuals and families become self-reliant and prepare for emergencies (see Section 6).</i></li> <li>• <i>Help gather neighbor contact information, identify those with special needs, and identify neighbors with skills that could help with response and recovery (medical, equipment, utilities, etc.)</i></li> <li>• <i>Train ministering brothers and sisters on their responsibilities to assess and help the families to which they are assigned.</i></li> </ul>	<ul style="list-style-type: none"> <li>• <i>Coordinate with the bishopric and ward council to provide needed assessment and relief.</i></li> <li>• <i>Contact each ministering companionship to request help with initial assessments and assistance.</i></li> <li>• <i>Report the conditions and needs of ward members to the bishopric and ward council.</i></li> </ul>

#### 4.5 Ministering Brothers and Sisters

Before an Emergency (Preparation)	After an Emergency (Response)
<ul style="list-style-type: none"> <li>• <i>Encourage families to prepare for emergencies (see Section 6.0).</i></li> <li>• <i>Request and share emergency contact information if possible.</i></li> </ul>	<ul style="list-style-type: none"> <li>• <i>Visit or contact each family to assess needs.</i></li> <li>• <i>Report the conditions and needs of ministering families to the Elders Quorum and/or Relief Society presidency.</i></li> </ul>

#### 4.6 Members and Neighbors

Before an Emergency (Preparation)	After an Emergency (Response)
-----------------------------------	-------------------------------

<ul style="list-style-type: none"> <li>• <i>Conduct family emergency planning and exercises.</i></li> <li>• <i>Prepare 72-hour kits and emergency food supply.</i></li> <li>• <i>Obtain first aid and CPR training.</i></li> <li>• <i>Learn how to turn off home water, electricity, and gas sources.</i></li> </ul>	<ul style="list-style-type: none"> <li>• <i>Provide for own family needs.</i></li> <li>• <i>Contact and provide for immediate lifesaving care for neighbors and ministering families.</i></li> <li>• <i>Contact emergency responders (dial 911).</i></li> <li>• <i>Contact ward leaders and assist in volunteer efforts.</i></li> </ul>
----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

## 5.0 EMERGENCY COMMUNICATION AND RESPONSE

### 5.1 Communication Guidelines

During a disaster, normal means of communication may become inoperable; however, the need to communicate with Church leaders, missionaries, members, employees, civil authorities, and others is greatly increased.

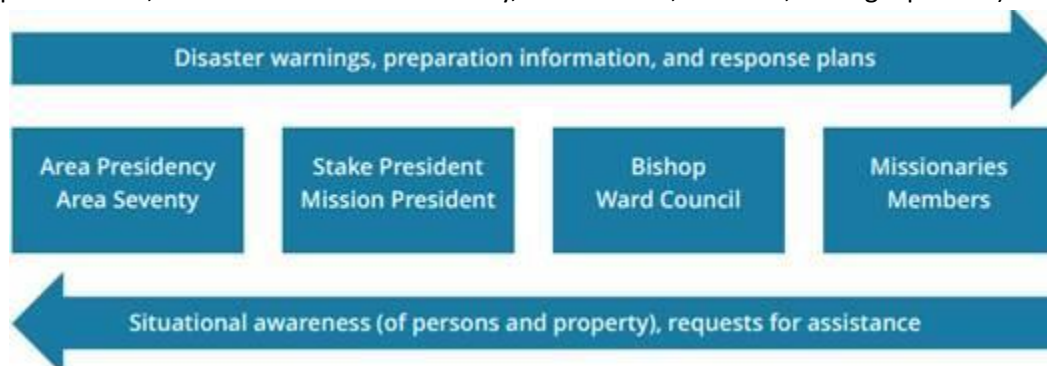

The bishop may call members of the ward to be communication specialists who may own communications equipment and possess valuable experience. Alternative communication methods will be needed in case phone lines, cellular phone service, or vehicle transportation routes are disrupted during a disaster. Such methods may include:

- Civil alert notification (e.g., CodeRED, IPAWS)
- Cell phone
- Landline phone
- SMS/Test Messaging (may be available even if voice service is not).
- Internet communications (including email, social media, Skype, web conferencing)
- Satellite phone.
- Amateur (HAM) radio.
- Family band (Family Radio Service - FRS) radio.
- Personal contact via foot, bicycle, etc. (Full-time missionaries can also help.)

If needed, bishops and the stake president will communicate locally using [FRS channel 7-35](#). A radio has been provided for each bishop's office. This equipment should be checked at least annually.

### 5.2 Emergency Assessment and Response

Evaluate the status of missionaries and members (deaths, injuries, psychosocial needs), members' property, Church facilities, and the community at large (giving extra attention to Church members with special needs, such as those who are elderly, homebound, disabled, or single parents).

Communicate this evaluation information as soon as possible to the Area Seventy, who in turn will inform the Area Presidency, the Director for Temporal Affairs, and the welfare and self-reliance manager.

## 6.0 MEMBER EMERGENCY PREPARATION

Preparedness includes developing a plan for how to take care of basic needs during an emergency. Members are encouraged to build both a short-term and longer-term supply of food, water, and other necessities. For more information, see [“Temporal Preparedness Resources.”](#)

### 6.1 In Case of Emergency...

1. Move to a safe place.
2. Help injured persons.
3. Contact family members.
4. Check with immediate neighbors and assigned ministering families.
5. Contact Relief Society and/or priesthood leaders.
6. Help with cleanup and recovery.

### 6.2 Family Emergency Preparation

Ward members are encouraged to plan and prepare for emergencies. This preparation may include:

- Make a family emergency plan (contacts, meeting locations, etc.)
- Sign up with [Code Red](#) to receive emergency notifications from St. George City
- 72-Hour Kit for each family member (food, water, clothing, medications, etc.)
- Lifesaving medical skills (first aid, CPR, etc.)
- Three-month supply of food that is part of your normal daily diet
- Drinking water
- Emergency financial reserves
- Medication and first aid supplies
- Clothing and bedding
- Important documents
- Longer-term supply of basic food items

### 6.3 Family Preparedness Resources

The following resources are available to help with family emergency preparedness:

- All Is Safely Gathered In: Family Home Storage (04008)
- All Is Safely Gathered In: Family Finances (04007)
- [www.providentliving.org](http://www.providentliving.org) (family emergency preparedness and response)
- [www.bereadyutah.gov](http://www.bereadyutah.gov) (excellent website for family emergency plans, communication plans, 72-hour kits, earthquake preparedness, flood preparedness, car survival, etc.)
- [www.ready.gov](http://www.ready.gov) (family emergency plans, 72-hour kits, etc.)
- [www.fema.gov](http://www.fema.gov)

- [www.redcross.org](http://www.redcross.org)
- [www.osha.org](http://www.osha.org)

## 7.0 EMERGENCY SHELTERS

Following a disaster, the use of a Church meetinghouse as a community emergency shelter is occasionally needed. Permission to use a meetinghouse is granted by the stake president, after consulting with a member of the Presidency of the Seventy or the Area Presidency. Following approval, the priesthood leader should contact his Church physical facilities representative (PFR).

### General Conditions and Guidelines

- While the use of a meetinghouse as a temporary community shelter may occasionally be needed, a Church building generally should not be the first choice. Other community facilities are better suited to accommodate the lodging of large numbers of people.
- If wards or stakes are approached by a local organization desiring to enter into a pre-disaster agreement, the stake president should seek area approval. Following approval, the insurance section of the Risk Management Division should be contacted for needed documents.
- When a meetinghouse is used by a community agency, Word of Wisdom standards should be observed in the building and on surrounding Church property. The chapel and offices are not to be used except for Church purposes. Cooking equipment and heaters that are not part of the meetinghouse furnishings may not be used in the building. Pets, other than service animals, are not allowed in the building.
- The stake president or bishop should assign a priesthood holder to be present any time the building is being used.
