

What is the question?

Introduction

Define the key terms in the question. Are there any links/connections between the key concepts, what are they? How are they related?

Main body

PEEDL X 2/3

Point 1

Point

The introduction of a maximum price may impact on the market for food

Analysis – expand on the point giving causes/consequences. Give examples if you wish but not required

Draw and explain a diagram to support your analysis (if appropriate). Link back to the question. The diagram must be fully labelled and explained in detail

Point 2

<u>Point</u>	<u>Analysis – expand on the point giving causes/consequences</u>	<u>Draw and explain a diagram to support your analysis (if appropriate). Link back to the question</u>

Conclusion – No judgement needs to be made here. You just need to provide a summary of what you've already discussed.

Example - *In conclusion, common access resources generate negative production externalities, leading to overproduction and market failure due to the negative impacts on sustainability and future generations. This could then warrant government intervention in the market for common access resource*
