

notes dgleba

--

Run windows remote app on linux ubuntu.

Windows host.

Linux client machine to run windows app remotely and show in a window in linux.

See: <http://davidgleba.blogspot.ca/2017/01/how-to-run-windows-remoteapp-on-ubuntu.html>

Research:

The question...

<http://superuser.com/questions/585762/how-to-run-a-program-remotely-and-show-it-locally>

how to run remote windows app on windows client and or linux client

Reference..

[https://technet.microsoft.com/en-us/library/cc755055\(v=ws.11\).aspx](https://technet.microsoft.com/en-us/library/cc755055(v=ws.11).aspx)

2017-01-22

<http://daviwa.blogspot.ca/2016/04/remoteapp-how-to-run-windows.html>

I never had any luck with winconn and it is not necessary.

I may have installed dependencies needed for freerdp in that process though.

```
wget https://launchpad.net/~realender/+archive/ubuntu/winconn/+files/winconn_0.2.14-1_all.deb
```

Install WinConn on Ubuntu 14.04

If the Ubuntu version (# 3) is 13.04, 13.10, 14.04 and so on, we have to install the missing dependencise next to install WinConn package.

=

```
dg@redwemx ~ $ sudo apt-get install freerdp-x11 gir1.2-appindicator3-0.1 gnome-user-guide libfreerdp-plugins-standard libfreerdp1 libyelp0 python-apport python-crypto python-httplib2 python-keyring python-launchpadlib python-lazr.restfulclient python-lazr.uri python-oauth python-problem-report python-secretstorage python-simplejson python-wadllib python-zope.interface yelp-xsl
```

[sudo] password for dg:

Package libfreerdp1 is not available, but is referred to by another package.

This may mean that the package is missing, has been obsoleted, or

is only available from another source

However the following packages replace it:

```
libxfreerdp-client1.1:i386 libwinpr-winsock0.1:i386 libwinpr-winhttp0.1:i386 libwinpr-utils0.1:i386 libwinpr-timezone0.1:i386

```

sudo apt-get install -y

=
sudo dpkg -i winconn_0.2.14-1_all.deb

error:

Package libfreerdp1 is not available, but is referred to by another package. This may mean that the package is missing, has been obsoleted, or is only available from another source.
 However the following packages replace it:

libxfreerdp-client1.1:i386 libwinpr-winsock0.1:i386

This will show dependencies...

sudo dpkg -l winconn_0.2.14-1_all.deb

<http://askubuntu.com/questions/672158/winconn-dependencies-issue>

Install dependencies and then force install...

```

wget https://launchpad.net/~realender/+archive/ubuntu/winconn/+files/winconn_0.2.14-1_all.deb
sudo dpkg --force-all -i winconn_0.2.14-1_all.deb

```

Worked. Wincon is running.

I set up the windos stuff in justin server 2012

I used kimknight remote app tool.

Reg hack..

<http://stanev.org/winconn/AllowReamoteAPP.reg>

Windows Registry Editor Version 5.00

```
[HKEY_LOCAL_MACHINE\SOFTWARE\Policies\Microsoft\Windows NT\Terminal Services]
"fAllowUnlistedRemotePrograms"=dword:00000001
```

<https://blog.kevinlin.info/running-windows-applications-in-linux-with-server-2012-r2-and-remoteapp/>

rdesktop HOSTNAME -u USERNAME -d ADNAME -s APPLICATION_NAME -g WIDTHxHEIGHT -r disk:SHARE_NAME=LOCAL_PATH -p

rdesktop 192.168.88.60 -u dg -s write -g 1024x768 -r disk:\\DG-WIN7ULT4\Users\dg=/opt/winshare -p -

==

Works kind of - it gives a full remote desktop. it works ok as full desktop.

```
rdesktop 192.168.88.60 -u dg -s "Windows Write" -g 1324x680 -r disk:\\DG-WIN7ULT4\Users\dg\dg_rmt=/opt/winshare -p x
rdesktop 192.168.88.60 -u dg -s "Windows Write" -g 1324x680 -r disk:\\DG-WIN7ULT4\Users\dg\dg_rmt=/opt/winshare -p x
```

==

<https://github.com/FreeRDP/FreeRDP/wiki/RemoteApp>

xfreerdp /u:dg /p:x /app:"||calc" /v:192.168.88.60

--

worked:

win7ult4 on vitrualbox on redwe host. linux mint 18 xfce client.

xfreerdp /u:dg /p:x /app:"||Windows Write" /v:192.168.88.60

/opt/freerdp-nightly/bin/xfreerdp /u:dg /p:x /app:"||Windows Write" /v:192.168.88.60

```
