Subject Line: Why Volkswagen Cars Are Better Than Ordinary Cars for Winter

Most cars require a really long list of winter preparations,

You see an Ordinary cars have so many things to repair or change some of the car parts because they are damaged during the winter, such as:

- * Drain radiator
- * Flush thoroughly
- * Rubber hose
- * Heater hose

And many more

While Volkswagen cars have only one thing to prepare for winter.

*

Subject Line: I purchased a Volkswagen car, and my life became way easier.

My happiness goes from 0 to 100.

Before I had a Volkswagen car,

My car is very old and cheap on the market, and I had to buy it just to go to work faster.

And not use transport again to get there, and many times I got late because of slow transportation speed, traffic, and not taking shortcuts.

Even though my car is cheap and old, there are still many expenses to maintain it.

Such as changing oil, refilling gas, and many more.

And it gets even worse when it comes to the winter season.

There are a lot of things to change or replace when something is damaged.

Such as drain radiator, flush thoroughly, check rubber hose, refill with anti-freeze, check heater hose, check heater, check for droughts, and change oil.

And I was FURIOUS about the price that I was getting to replace all of those to just drive my car again.

And a few weeks later, when I was driving on the highway, I saw a billboard ad called Volkswagen, a car brand, and they were talking about a car that requires less maintenance or expenses for winter.

I quickly drove home and started calling Volkswagen on the telephone.

And they started asking me some questions so they could recommend the perfect car for me.

And **IT DID**.

They'd offer me a perfect car with fewer expenses for winter, and it was also cheap.

I feel so happy, and it made my life easier when I saw the ad and gave exactly what I wanted (less expenses).

I thank Volkswagen; they helped me find the perfect car.
