## Introduction (size 10pt)

It is typed [bold, 10 size, Time New Roman font], The introduction is typed in bold letters, containing the background described with the previous state of the art research.

**The introduction contains an explanation behind the community service activities.** The preliminary includes the background of the studies that have been done previously both by devotees and by other researchers so that they are considered suitable to be applied to community service activities. The Introduction contains supporting references in the bibliography. The reference referred to in the introduction is the most recent reference about science and technology that will be applied. This is to illustrate the state of the art of science and technology. Get to the key parts others paper sooner rather than later.

Tips:

1. Article length between 2000-3000 words (Not including bibliography, notes, and tables).
2. Begin the Introduction by providing a concise background account of the problem studied.
3. Stat of the art.
4. Articles are typed in Microsoft Office Word format. By using the font Times New Roman size 10, single spacing on "Custom Size" paper (size width = 21 cm and height = 28 cm).

## Method

The research method describes: the approach, scope or object, place, population and sample/informant, main materials and tools, data collection techniques, and data analysis techniques. Last, please avoid to make a sub section in Method. [font Times New Roman, 10, Normal].

## Results and Discussion

Results and discussion are written in the same chapter. This journal is an applied scientific work so that the results and discussion are based on original research related to community service. The type of research depends on the area and topic of community service (impact of activities, surveys, interviews, questionnaires, experiments/demonstrations, etc.). The results and discussion are based on analysis and interpretation between theory and community service programs. This section can also be supplemented with problems encountered in implementing community service programs related to the implementation of science and technology that is carried out. Results and discussion are presented simultaneously, starting from the main results and supporting results and explained with discussion.

The use of measurement units must use international system units. Figures and tables are not placed on the results and discussion, but write the reference figures and tables in the Results and Discussion Chapter. Subchapters to separate the explanation of the results and discussion of several activities can be made in this chapter if needed. Figures and Tables are placed separately at the end of the manuscript after the bibliography with the title/number of images/tables in each picture/table.

All tables should be numbered with Arabic numerals. Headings should be placed above tables, left justified. Only horizontal lines should be used within a table, to distinguish the column headings from the body of the table, and immediately above and below the table. Tables must be embedded into the text and not supplied separately. Below is an example which authors may find useful.

Table 1. An example of a table.

An example of a column heading	Column A (t)	Column B (T)
And an entry	1	2
And another entry	3	4
And another entry	5	6

References should be listed at the end of the paper. Authors should ensure that every reference in the text appears in the list of references and vice versa, (Iskandar et al., 2018).

Some examples of how your references should be listed are given at the end of this template in the ‘References’ section which will allow you to assemble your reference list according to the correct format and font size.

All figures should be numbered with Arabic numerals (1,2,...n). All photographs, schemes, graphs and diagrams are to be referred to as figures. The figure number and caption should be typed below the illustration in 8pt and center.

Artwork has no text along the side of it in the main body of the text. All figures and tables must be numbered consecutively.

Figure 1. Example **Image quality must be clear**

Equations and formulae should be typed and numbered consecutively with Arabic numerals in parentheses on the right hand side of the page (Eq. 1).

$$R_t = K_{EP} = 93.02(\pm 9.62) - 13.45 \quad (1)$$

They should be separated from the surrounding text by one space.

Copyright, while submitting an article, authors will be asked to Transfer Intellectual Property Rights and Exploitation Rights. Acceptance of the conditions will ensure the widest possible dissemination of information. Subscribers may reproduce tables of contents or prepare lists of articles including abstracts for internal circulation within their institutions. Permission of the Publisher is required for resale or distribution outside the institution and for all other derivative works, including compilations and translations.

## Conclusions

Conclusions must be clearly stated. Conclusions are built from the results and discussion. Conclusions can be supplemented with suggestions related to the article. It is important that the conclusion does not leave the question unanswered.

Tips:

1. State your conclusions clearly and concisely. Be brief and stick to the point;
2. Explain why your study is important to the reader. You should instill in the reader a sense of relevance;
3. Prove to the reader, and the scientific community, that your findings are worthy of note. This means setting your paper in the context of previous work. The implications of your findings should be discussed within a realistic framework, and;

**Acknowledgements:** Insert acknowledgements here (if any)

**Funding Statement:** Insert funding information here (if any)

**Contribution:** Surname1: Conceptualization, design, analysis, writing. Surname2: Editing/reviewing, supervision. ... (Each author must have contributed to at least one aspect of each of these criteria: concept and design, data acquisition, data analysis / interpretation, drafting manuscript, critical revision of manuscript, statistical analysis, securing funding, admin, technical or material support, supervision, final approval.)

## References

References it contains sources of references with at least 80% of the literature published in the last 5 years and Minimum reference 80% from primary literature sources or accredited national journals and / or reputable international journals. References should follow the style detailed in the **APA 7th Publication**. Make sure that all references mentioned in the text are listed in the reference section and vice versa and that the spelling of author names

and years are consistent. Please to not be used footnote or endnote in any format. Examples: APA Style and we suggestion to using Mendeley.
