

Community School Newsletter - Committee Progress Update

Greetings, Edison School Community,

We hope this newsletter finds you well and thriving within our community. The Edison Community School Site Implementation Committee is excited to share the latest developments in our ongoing efforts to enhance our educational environment.

1. Parent-Led Walk Recap:

Our committee recently reviewed the progress made during the parent-led walk that took place on December 6. Supported by our valued educational partners OCCCO and dedicated committee parent members, the walk provided valuable insights. We are eager to organize more parent-led community walks in the future, fostering community engagement. Look out for updates on dissemination plans for the information gathered during these walks, which will be shared in upcoming staff meetings.

2. Project-Based Student Presentations:

Our students have successfully completed phase 1 of their project research on community school pillars. Soon, they will be presenting their projects in 4th-grade classrooms. This initiative aims to not only build school-wide capacity but also to offer their peers a deeper understanding of the four pillars that form the foundation of our community school.

3. Needs and Assessment Survey Analysis:

Our committee has delved into the analysis of the Needs and Assessment Survey, focusing on the 3-5 Likert scale question types. The initial examination involved scrutinizing overall summaries based on percentages and the total number of survey participants in our community. As we proceed, the second part of our analysis will involve exploring responses to the six open-ended questions. This phase is crucial for identifying community needs and preparing for our collective call to action.

We appreciate the active involvement and support of our community members. Together, we continue to shape the future of our community school. Our next meeting scheduled for March 6, at 8:30 will be a Part 2 of our data collection.

Best regards,

Edison Community School Site Implementation Committee
