

Balanced Assessment System Pilot Recruitment

In January 2024, CCEE will be launching a Balanced Assessment System Pilot consisting of a micro-course with a toolkit designed to support local educational agencies (LEAs) in creating balanced assessment systems.

In partnership with the Center for Assessment, CCEE is excited to invite interested district-school leadership teams to join this six-month learning network. From January through June 2024, selected LEAs will pilot the micro-course and associated tools for self-paced implementation within their local contexts. The Center for Assessment will provide guidance on how best to utilize these resources and LEAs will have an opportunity to provide feedback that will inform future versions of these state resources.

This opportunity is a right fit for LEAs wanting to conduct a review of their current systems of assessment, especially if deciding to make further investments in interim and/or curriculum-embedded assessments.

Micro-Course

Watch professional learning modules designed to help district-school leadership teams balance their local assessment systems

Toolkit

Utilize evidence-based tools to help your LEA review its district and/or classroom assessment system, identify the highest priority needs, and monitor implementation

Expert Coaching

Engage with expert practitioners from the Center for Assessment to guide your LEA in utilizing these resources to achieve your assessment system goals. There will be four touchpoints between January through June.

Research & Development

Participate in a R&D effort to provide California school districts with resources to support more balanced systems of assessment to accelerate student learning

Interested in learning more? Watch the [recorded informational session](#) that was hosted on October 16th.

Ready to sign up? Complete the [interest and readiness survey](#). LEAs will be selected and notified by the end of November based on project goals and LEA readiness.
