

POW #4 - Algebra

The Algenauts baseball team just finished a great year. During the season, they won three out of every four of their home games and two out of every three of their away games. All together they won 40 more games than they lost. If they played as many home games as away games, what was their final record of wins and losses?

Provide a detailed description of your solution.

Submit your solution in a GoogleDoc that is in your Mathematics Folder. You must explain your solution in sentences! Use the classroom scanner to scan documents and email to yourself.
