

Name: _____ Class Period: _____

Perishable vs. Non-Perishable:

- Why is it important to know whether an item is perishable or non-perishable when transporting goods?
- Give one example of a perishable item and one example of a non-perishable item. How might their transportation needs differ?

Shipping Costs & Decisions:

- Based on what you learned about shipping costs, which method (air, land, or sea) do you think is best for transporting perishable goods? Why?
- If you were running a business, what factors would you consider when choosing how to ship your products?

Quick Connection:

- In one sentence, summarize how transportation, cost, and food perishability are connected.
