

We are trying to put together a short roster of our team members for this year on our [website](#). I'll need a profile picture of you (preferably a recent robotics one) and a one paragraph write up (if it goes a little over a par. that's fine), explaining your history in FIRST and some things you've learned from FIRST, and if you have room, you dream job. Also put your role on the team (i.e. Programmer, Builder, etc.)

Here are some prompts to get you started.

- What current positions are you in?
- What's your history in FIRST
- What are your skills?
- What interests you?
- Why are you in robotics?
- Do you like doing what you're doing?
- What's your dream job?
- Have you ever been on a robotics team?

Here is an example from Demetri's FTC bio [write up](#) from 2013 to give ideas. You can also look at the bios already on our site [here](#).

Please write your bio in third person. Also, don't include anything you don't want to be shown public, as your bio and picture will be posted to our site.

**Please send bio and profile to: [team2550robotics@gmail.com](mailto:team2550robotics@gmail.com)**
