The best country you'll ever travel to...

Intro

I can tell you why Canada is the best country to visit because...

Email

Canada is the **best** country to visit and here is why. When you first get off the plane at Toronto Pearson International Airport. The landscape of the country is astonishing and the people are one of the nicest nations across the globe.

In Canada There are large famous cities and they are called Montreal and Toronto. Many more famous cities to visit. Here are some of the most popular activities. start

In Montreal here are some recreational options that you could do.

You have a opportunity to exploring the underground city, a network of tunnels and shopping centers that connect many of the city's building and attraction

It is possible for you to also try some of Montreal's famous bagels, which are boiled in honey water before being baked and have a unique texture. The flavors were out of this world when I took the first bite it felt like when I just bite into a soft sweet baked apple pie

In Toronto here are some entertainment choices

It is within the realm of possibility to visiting the royal ontario museum, which has a large collection of art, culture and natural history exhibits

You could take a walk along the waterfront which offers beautiful views of lake ontario and the Toronto skyline with plenty of outdoor actives

PS: I would recommend this country to anyone who is traveling for the first time

Always the best,

Caleb
