

A virtual OAME leadership event featuring
Dr. Elham Kazemi

Wednesday, November 5th, 2025

7:00 - 8:30 p.m.

Stories Count:

Interweaving storytelling with mathematics

Great math discussions don't just happen; they're planned with care and led with heart. When students feel heard, supported, and a true sense of belonging, the conversation comes alive.

We're thrilled to welcome **Dr. Elham Kazemi** as this year's *OAME Leadership Conference* keynote. A masterful speaker and widely respected leader in mathematics education, Dr. Kazemi brings inspiration, insight, and deep practical knowledge to this work.

She'll help us explore how storytelling and intentional facilitation can support meaningful, inclusive math talk, and how we, as math leaders, can guide and sustain this in our schools and systems.

We'll look at how to:

- Design math talk that meets a range of learning goals
- Support students to build on each other's ideas and feel heard
- Use listening as a tool for connection and growth
- Center student thinking in planning and practice

Join us for a session that will challenge, refocus, and inspire our work as math leaders across Ontario.

Register at: <https://mcis.oame.on.ca>

\$25 for OAME/AOEM Members

\$40 for non-Members

\$10 for B.Ed. Students (use code BEdStudent at checkout)

A certificate of participation for this OAME/AOEM Professional Development will be sent afterwards.
