

screen capture scavenger hunt

Task: create a PowerPoint presentation with the following screenshots:

1. evidence of you Googling yourself
2. proof that you visited the Stawamus Elementary School website
3. proof that you visited Mr. Georgy-Embree's class website (you may need to ask a friend for the address)
4. proof that you played some sort of approved educational game
5. proof that you found some online exercises that taught you something about fractions
6. evidence that you found an image of a waxing gibbous moon
7. proof that you had two separate windows open on your desktop (Paint & Smartnotebook)
8. proof that you found something that tells you the moon phase for January 23, 2015 (the date must be indicated on this screenshot)
9. evidence of you saving your presentation into the correct location
10. a satellite image of our school (<https://www.google.ca/maps> >> 38030 Clarke Drive, Squamish, BC)
11. Challenge: a screenshot of your PowerPoint presentation with all slides visible
12. Another challenge: Using Street View, find your house and add a screenshot of that.

Your slideshow should be at least ten slides long and be saved in the appropriate location using your name as the file title (e.g. william.pptx). Each of your slides should have a title (e.g. Me Googling Myself). See the image below. You're welcome to add a title slide.

ME GOOGLING MYSELF
