

Scattered Chaos

Developer Email: supersaiyanmikito@yahoo.com

Story: When Twilight and co. investigate a strange power from the Everfree Forest, they are attacked by a mysterious pony and the Elements of Harmony are drained of all power. Mysterious "Dark Zones" start appearing all over Equestria soon after turning everything within them into a shadow of what it once was. Now Twilight and friends much venture out and rid the world of the Dark Zones and restore power to the Elements of Harmony.

Gameplay: Plays similar to Zelda in that there are multiple regions, each with their own sub-areas and dungeons. Each of the Mane 6 are playable and you can choose 3 of them at once and make an interchangeable team. You can swap between any of the 3 in your party at anytime and you can speak to the other ponies to swap them in for someone else.

Progress: In Alpha stages. Would be a heck of a lot further with someone separate working on the sprites. I'm too slow at it and it's dragging me down.

Needed Help: Sprites... That's about it. Everything else has already been filled or I am doing it myself. I can do sprites as well but its drastically slowing down production speed having to spend hours on just one sprite.
