Abstract The abstract should clearly summarize the research and enable reviewers to evaluate its scientific quality, originality, and relevance to the conference. The abstract should be written in clear English and contain 250–350 words. The abstract should include the following sections: Background: Briefly introduce the research context, identify the problem or knowledge gap, and explain why the study is important. Objective: Clearly state the aim or research question addressed in the study. Methodology: Summarize the materials, methods, experimental procedures, analytical techniques, or numerical approaches used. Results: Present the principal findings. Whenever possible, include important quantitative results rather than general statements. Conclusions: State the main conclusions, practical implications, and significance of the work. The abstract must be written in English. The title should be concise and informative. Avoid references, tables, figures, equations, and unexplained abbreviations. The abstract should accurately reflect the content of the full paper. Ensure that all results and conclusions are supported by the presented study.

Keywords: Provide 3–5 keywords that best describe the main topics of the study separated by semicolon;

Novelty Statement: Briefly describe the original contribution of this work and explain how it differs from previously published studies (maximum 100 words).
