What Is ConversioWidgets All About?

ConversioWidgets is a cloud-based “AI” software which uses a variety of widgets to increase sales, leads and conversions.

It’s designed to increase the conversions of almost any website.

- Affiliate Review Sites
- List-Building Pages
- Bonus Pages
- WordPress Blogs
- Sales Letters
- eCommerce Websites
- Local Business Sites
- Webinar Registration Pages
- Consultancy Websites
- Freelance Websites

Almost ANY Website you can think of.

It exploits the new principle of “nudge marketing”.

“Nudge marketing” exploits three powerful principles of buyer psychology:

- scarcity
- urgency
- and the fear of missing out.

Sites like booking.com send intelligent “nudge notifications” to their visitors.

They use real website data and AI to send these notifications at the perfect time.

They grab their visitors’ attention and smartly “nudge” them into action.

Over the last two years we’ve developed **17 different widgets** including:

- a widget to automatically convert your returning visitors
- a widget to identify and automatically convert “hot” visitors (through our AI algorithm) into leads, email subscribers or sales
- a widget to automatically convert your most engaged visitors (based on a number of factors)
- widgets to increase your conversions through geo-targeting
- social proof widgets which displays your recent buyers or action-takers.
- our special “Blog widget” to blog directly into any website! (Perfect for anyone with multiple websites who wants to generate free traffic between their sites)
- a widget which identifies your visitor’s operating device and confirms compatibility with your product or service
- a widget which adds a customizable “hello bar” to your website (useful for notifications or sending traffic to another page or site)
- and many more!

It’s extremely user friendly and anyone can get started with ConversioWidgets on their Website in three simple steps:

Just check a box to select one or more of our 17 widgets (Step 1).

Then click to generate the widget code (Step 2).

And finally copy and paste the code on your Website (Step 3).

Any customization of certain widgets (for example adding a buy link to an offer, changing the design or adding custom text) can be done very easily.

ConversioWidgets comes with a full commercial license allowing the customer to sell our widgets and keep all the profit.

The best angle to position this to your subscribers is:

- get more leads, sales and bookings from your website
- build an email list faster
- generate free traffic (aimed at customers with multiple websites)

KEY POINTS:

- Drive more Leads and more Sales on almost ANY Website just by copying ONE line of code
- “AI” Widget Technology
- 17 done-for-you widgets in total!
