

**Problem: I'm out of flour and I need it right now!**

**Solution: Buy a Ford Model T!**

- A Model T only costs \$295. This is so much cheaper than a horse and buggy because you don't have to feed it. That means less chores around the house and more money to shop with!
- What happens when you run out of a necessity in the kitchen and you are not scheduled to make a day trip to town for two more weeks? If you have a Model T, you can just drive into town and grab the item you need and not have to do without for two weeks. After all, how can you bake a cake without flour?
- Your sister just have a new baby but you can't just drop everything to go see them because they live on the other side of town? If you have a Model T you could be there in minutes!
