What data is being collected

The app collects:

1. Approximate location
2. Errors reports
3. Ad ID
4. General device information - model, OS version

The app doesn't collect, store or transfer any personally identifiable information.

Why this data is being collected

The data is being collected for analytical purposes, to analyze errors and app installations across different versions, devices and OS distributions.

How this data is being processed

The app utilizes Google Firebase Analytics and Google Firebase Crashlytics to collect, transfer and store the information. More details about how Google uses this data can be found by this link <https://policies.google.com/technologies/partner-sites>
