

RD LABS

Learn Crypto
Find Crypto Gems
Support Crypto Projects

# Welcome to the RD Familia

The RD Labs Familia is about coming together and working as a group, using our skills and talents, to weed out possible rugs and scams, and find hidden gems in their earliest stages, and hopefully along the way make those big crypto gains.

## RD Labs

The RD Labs consist of:

- RD Labs Researchers
- RD Auditors
- RD Content creators
- RD Community

The places we hang out and discuss hidden gems and everything related to RD Labs:

You should have received an invite link to the VIP telegram and Discord groups through Patreon.

**RD Labs VIP group on Telegram**

**RD Labs Announcement group on Telegram**

**Here are a few links that will help you get started.**

## VIP Patreon Members Spreadsheet

This is the original spreadsheet on which the Rd community is based. The checklist tab is the method we use, and you can use, to do our due diligence on projects, and find the hidden gems. The Project Due Diligence tab gets updated when due diligence has been done on a project by Ken. When Ken enters a trade, he updates the Trading Opportunities and Results tab. It shows a few more things as well, including when Ken and/or the research team has meetings with devs and CEOs of projects.

## RD Checklist Form

Use this form to do your due diligence on projects. It's the same as the checklist tab in the VIP Patreon Member spreadsheet, but then in a systematic form. You can use either to do your research and due diligence on projects.
