

Communicable, Contagious, or Infectious Disease Prevention Policy

Adopted : 10-6-2021

Lighthouse Community Public Schools ("LCPS" or the "Charter School") recognizes its shared responsibility with the home and the community to promote appropriate disease prevention procedures in the disinfecting of surfaces within the school facility and the proper handling and the cleaning up of blood and bodily fluids.

LCPS desires to protect the entire school community without segregation, discrimination or stigma. Accordingly, infectious disease prevention shall be taught regardless of whether a student or adult is known to have an identified infectious disease.

All employees shall be provided appropriate periodic instruction in basic procedures recommended by the California Department of Education and other public health agencies and associations.

Incidence and transmission of communicable diseases will be further limited through a rigorous program of immunization and health screening required of all students, faculty, and staff, as per state requirements. Students found to have communicable diseases will be included in all activities deemed by a physician to present no hazard of infection to other students.

Immunizations

All enrolled students and staff will be required to provide records documenting immunizations as is required at public schools pursuant to Health and Safety Code Sections 120325-120375, and Title 17, California Code of Regulations Sections 6000-6075.

The school shall not unconditionally admit any pupil unless, prior to his or her first admission to the school, he or she has been fully immunized. This section does not apply to a pupil in a home-based independent study program pursuant to Article 5.5 (commencing with Section 51745) of Chapter 5 of Part 28 of the Education Code and does not receive classroom-based instruction. All rising 7th grade students must meet state mandated immunization requirements. (See "Immunization Policy")

Science Laboratory Instruction

Students involved in science laboratory experiences shall be protected from contamination from bodily fluids of other persons and from contaminated instruments. Whenever possible, laboratory experiences involving bodily fluids will be conducted by

way of teacher demonstration rather than by student participation.

Workplace Illness, Injuries and Accidents

LCPS shall strictly comply with its Exposure Control Plan for Infectious Diseases and Bloodborne Pathogens (“Exposure Control Plan”) to reduce the spread of infectious diseases in the workplace. Whenever exposed to blood or other bodily fluids through injury or accident, students and staff should follow the latest medical protocol for disinfecting procedures.as further outlined in the Exposure Control Plan.
